IEEE

Why we are here today

Support the IEEE mission of "Advancing Technology for Humanity"

- Enhance your ability to develop high-quality scholarly research papers
- Advance the careers of engineers and researchers
- Help authors share and disseminate critical information and emerging innovations with a global community
- Assist authors in selecting the best outlet for their research

Topics Covered in Today's Workshop

1. Publishing choices
2. Choosing an Audience
3. Paper Structure
4. Ethics
5. Where to Publish
6. Open Access
7. Impact Factor
8. Next Steps & Resources

IEEE

Choices

IEEE Journal or IEEE Conference?

- A **journal article** is a fully developed presentation of your work and its final findings
  - Original research results presented
  - Clear conclusions are made and supported by the data
- A **conference article** can be written while research is ongoing
  - Can present preliminary results or highlight recent work
  - Gain informal feedback to use in your research
- Conference articles are typically shorter than journal articles, with less detail and fewer references

IEEE Journal or IEEE Conference?

	IEEE Journals	IEEE Conferences
✓ **PRO**	IEEE journals cited 3 times more often in US patent applications than other leading publisher's journals	IEEE Conference proceedings are recognized worldwide as the most vital collection of consolidated published articles in EE, computer science, and related fields
✗ **CON**	High percentage of articles submitted to any professional publication are rejected	Per IEEE Policy, if you do not present your article at a conference, it may be suppressed in IEEE *Xplore* and not indexed in other databases

IEEE

Publication Types

- **Letters**: brief articles, fast publication
- **Journals and Transactions**: full-length research articles
- **Magazines**:
  - Feature articles: peer-reviewed, typically have fewer equations and references than a journal article
  - Columns such as editorials and society news are not reviewed

IEEE

Audience

What IEEE editors and reviewers are looking for

- Appropriate content, in scope and level
- Clearly written original material that addresses a new and important problem
- Extension of previously published work
- Valid methods and rationale
- Illustrations, tables and graphs that support the text
- References that are current and relevant to the subject

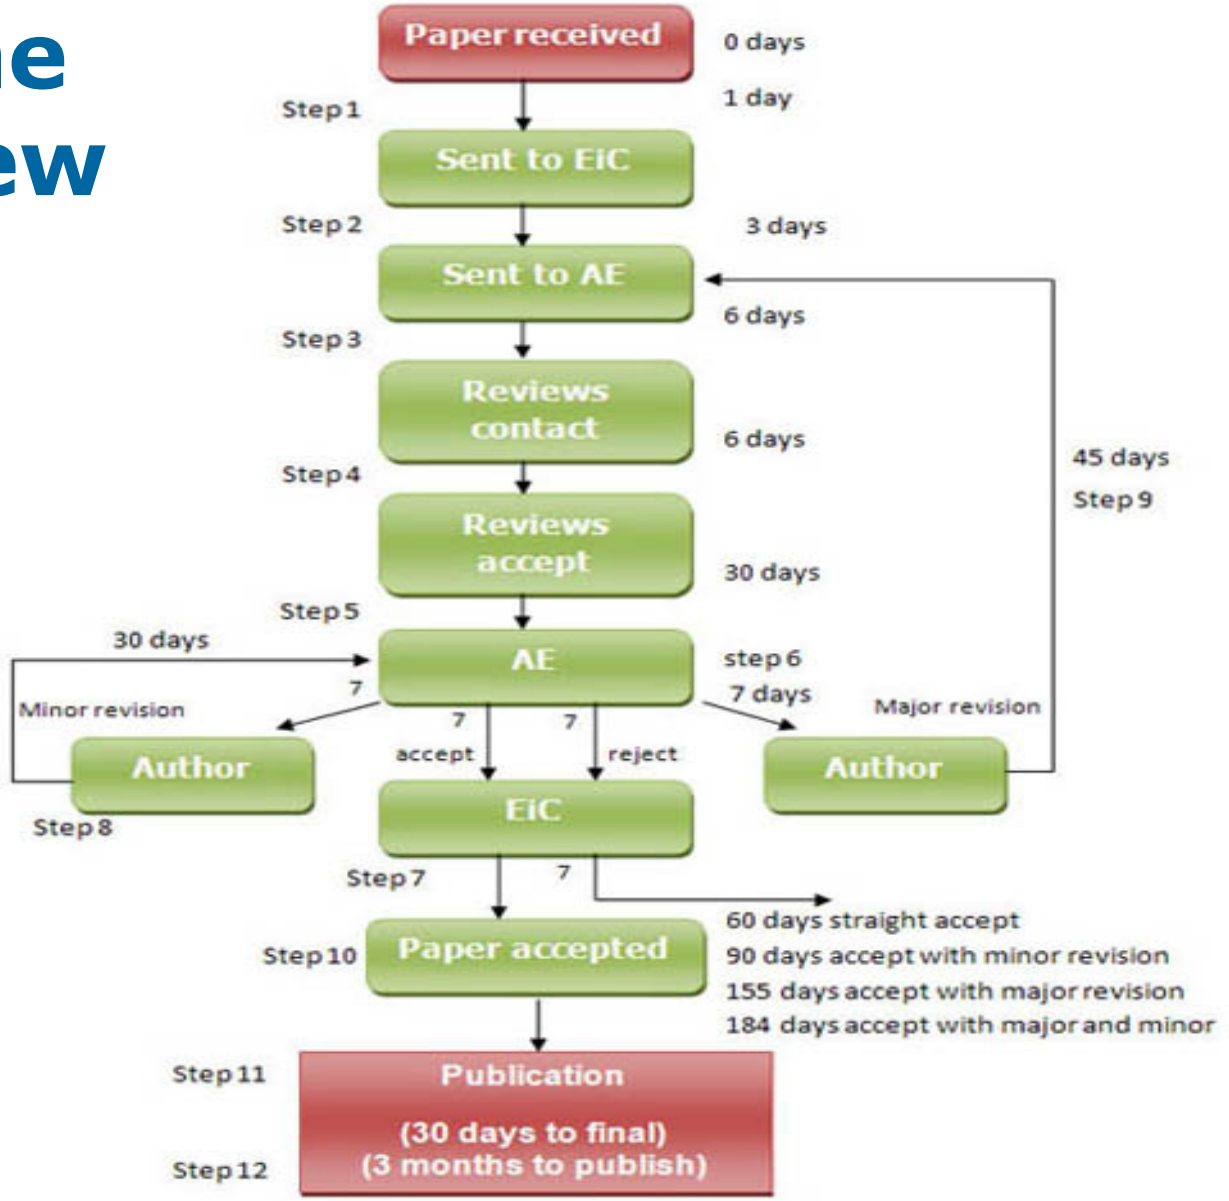
How does the review process work?

- Editor-in-Chief gets the paper after it goes through content match check (iAuthenticate) and "banned author" check
- If the paper is in scope for the journal, it is assigned to an Associate Editor
- Assoc. Editor assigns the paper to five or more reviewers
- Reviewers send their comments back to the editor
- Editor makes a recommendation to the EIC as follows
  - Accept
  - Revise & Resubmit
  - Reject
- The EIC makes the final decision and informs the corresponding author

IEEE

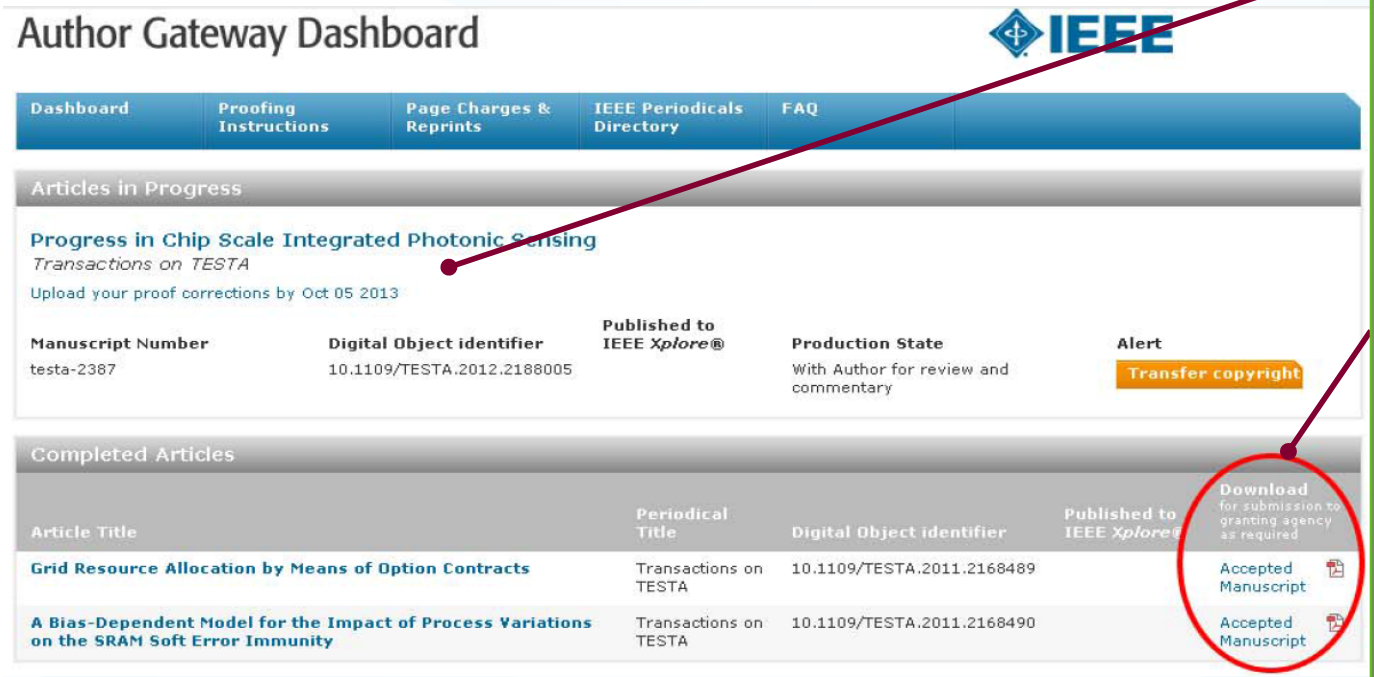
Example of one journal's review process

IEEE Transactions on Information Technology in Biomedicine



IEEE

Check the Status of Your Review



Track status and view the details of your manuscripts on the Author Dashboard.

Select the appropriate queue in the My Manuscripts section.

The results will display directly below the dashboard.

IEEE

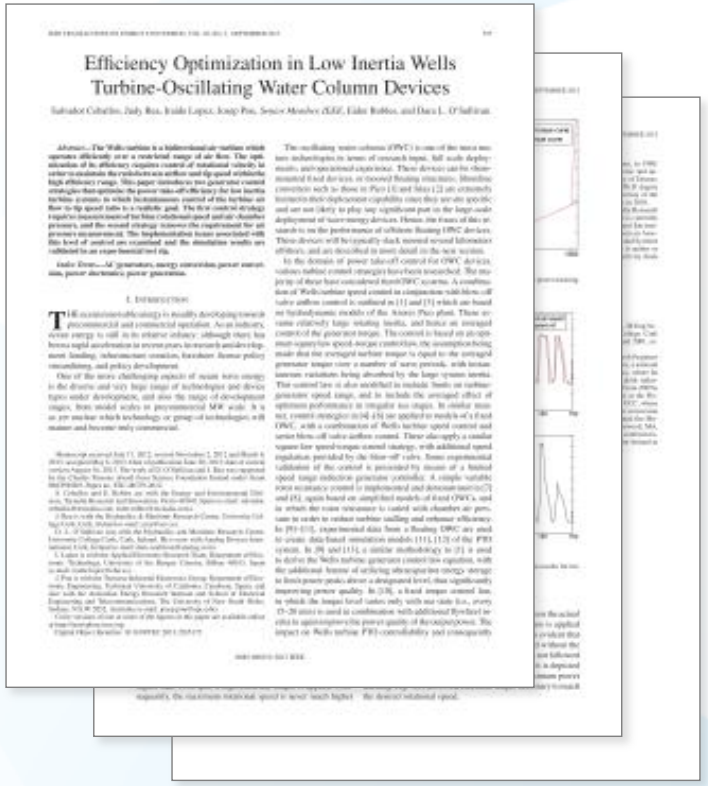
Why IEEE editors and reviewers reject papers

- Content is not a good fit for the publication
- Serious scientific flaws:
  - Inconclusive results or incorrect interpretation
  - Fraudulent research
- It is poorly written or quality is not good enough for journal
- The work does not address a big enough problem or advance the scientific field
- The work was previously published
- Work was submitted to multiple publications
- Reviewers have misunderstood the article

Structure

Elements of a manuscript

- Title
- Abstract
- Keywords
- Introduction
- Methodology
- Results/Discussions/Findings
- Conclusion
- References

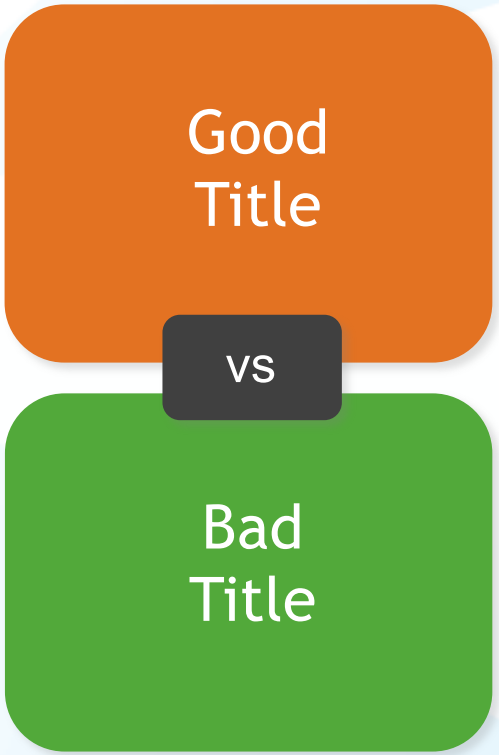


IEEE

Title

An effective title should…

- Answer the reader's question:
  "Is this article relevant to me?"
- Grab the reader's attention
- Describe the content of a paper using the fewest possible words
  - Is crisp, concise
  - Uses keywords
  - Avoids jargon



IEEE

Title Dos and Don’ts

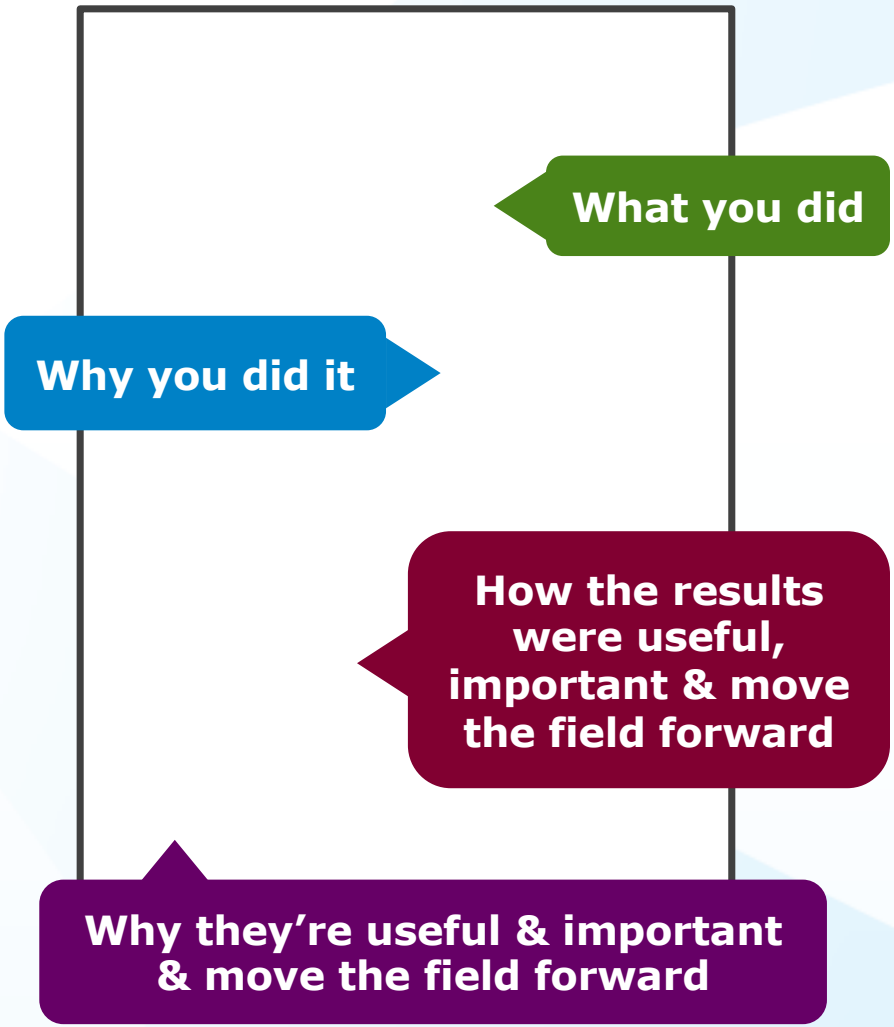
✗ *A better approach of managing environmental and energy sustainability via a study of different methods of electric load forecasting*

vs

✓ *A Human Expert-based Approach to Electrical Peak Demand Management*

Abstract

- A **concise, comprehensive reflection of your article**
- Self-contained, without abbreviations, footnotes or references
- Between 150-250 words. Adhere to these limits, otherwise you will need to edit your abstract accordingly.
- Written as **one paragraph**, and should **not contain** equations or tabular material
- Should include **three or four different keywords or phrases.** This will help readers discover your work.
- Avoid over-repetition of phrases as this can result in a page being rejected by search engines



IEEE

Abstract Dos and Don'ts

✗

The objective of this paper was to propose a human expert-based approach to electrical peak demand management. The proposed approach helped to allocate demand curtailments (MW) among distribution substations (DS) or feeders in an electric utility service area based on requirements of the central load dispatch center. Demand curtailment allocation was quantified taking into account demand response (DR) potential and load curtailment priority of each DS, which can be determined using DS loading level, capacity of each DS, customer types (residential/commercial) and load categories (deployable, interruptible or critical). Analytic Hierarchy Process (AHP) was used to model a complex decision-making process according to both expert inputs and objective parameters. Simulation case studies were conducted to demonstrate how the proposed approach can be implemented to perform DR using real-world data from an electric utility. Simulation results demonstrated that the proposed approach is capable of achieving realistic demand curtailment allocations among different DSs to meet the peak load reduction requirements at the utility level.

vs

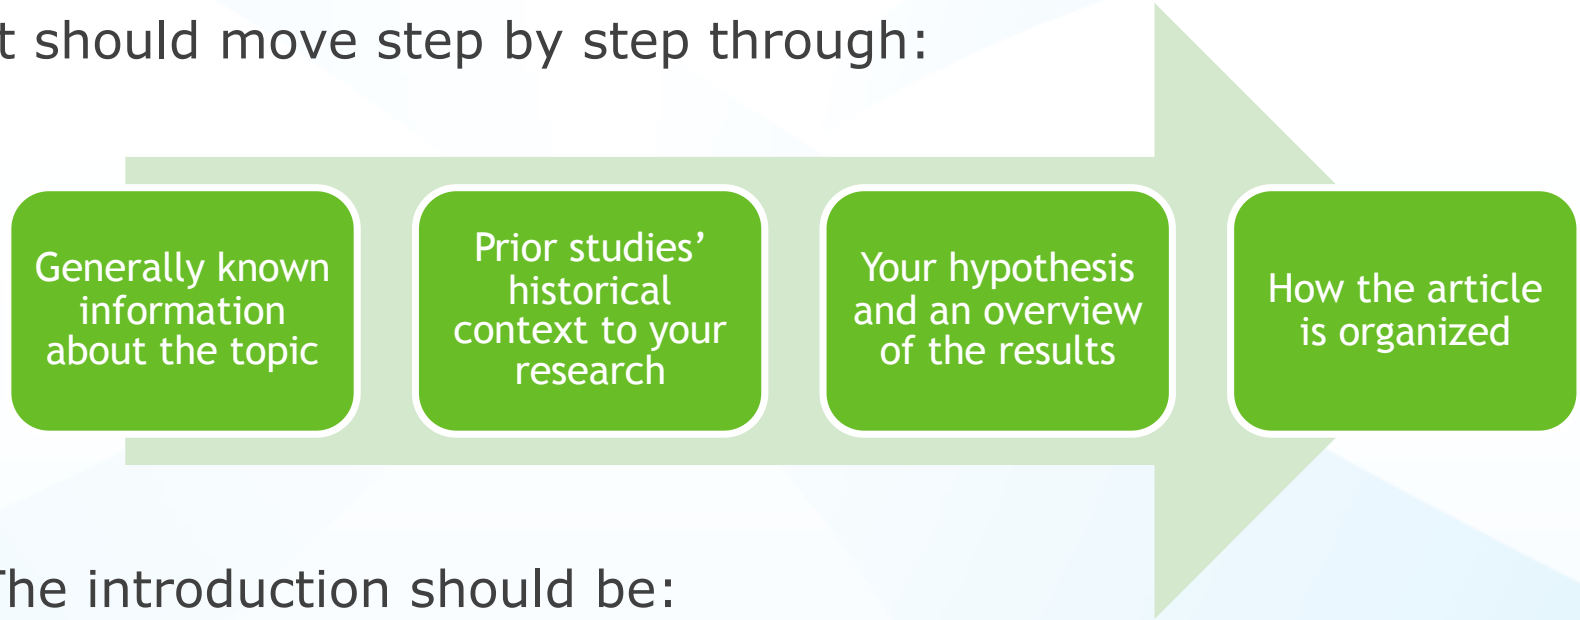
✓

This paper presents and assesses a framework for an engineering capstone design program. **We explain** how student preparation, project selection, and instructor mentorship are the three key elements that must be addressed before the capstone experience is ready for the students. **Next, we describe** a way to administer and execute the capstone design experience including design workshops and lead engineers. **We describe the importance** in assessing the capstone design experience and report recent assessment results of our framework. **We comment** specifically on what students thought were the most important aspects of their experience in engineering capstone design and provide quantitative insight into what parts of the framework are most important.

IEEE

Introduction

- A description of the problem you researched
- It should move step by step through:



- The introduction should be:
  - Specific, not too broad or vague
  - About 2 pages

IEEE

Methodology

- Problem formulation and the processes used to solve the problem, prove or disprove the hypothesis
- Use illustrations to clarify ideas and support conclusions

Tables
Present representative data or when exact values are important to show

Figures
Quickly show ideas/conclusions that would require detailed explanations

Fig. A

Graphs
Show relationships between data points or trends in data

IEEE

Results/discussion

Demonstrate that you solved the problem or made significant advances

Results: Summarizes the Data

- Should be clear and concise
- Use figures or tables with narrative to illustrate findings

Discussion: Interprets the Results

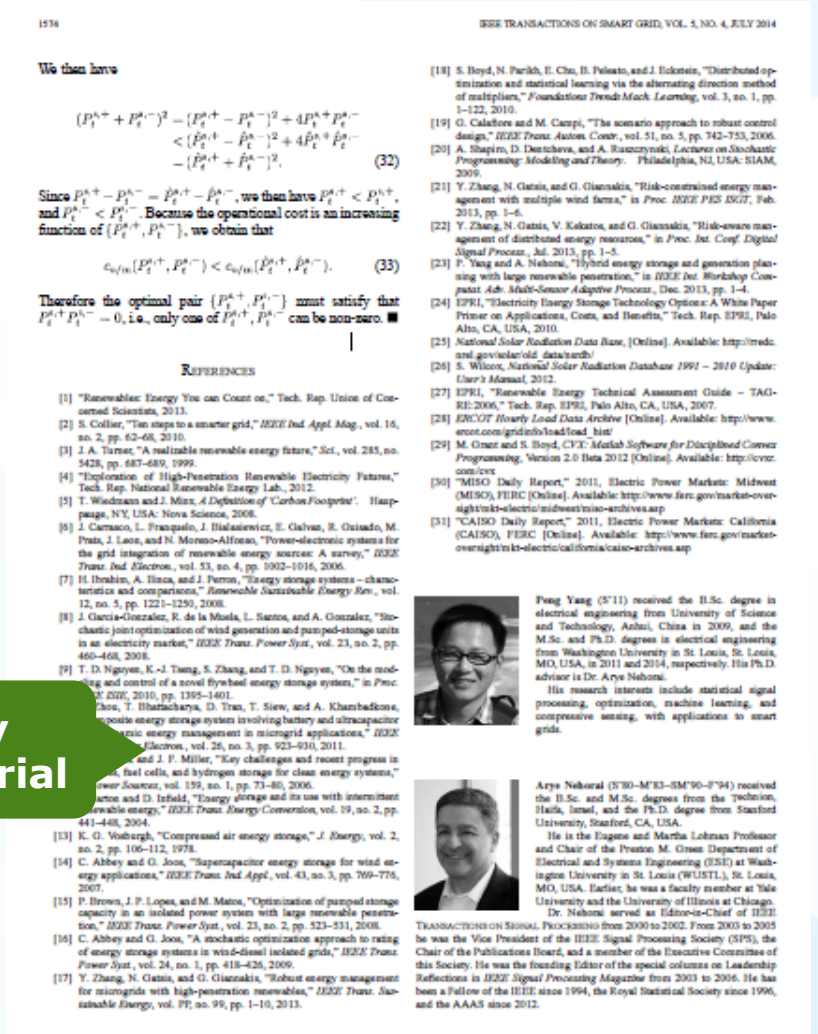
- Why your research offers a new solution
- How can it benefit other researchers professionals

Conclusion

- Explain what the research has achieved
  - As it relates to the problem stated in the Introduction
  - Revisit the key points in each section
  - Include a summary of the main findings and implications for the field
- Provide benefits and shortcomings of:
  - The solution presented
  - Your research and methodology
- Suggest future areas for research

References

- Support and validate the hypothesis your research proves, disproves or resolves
- There is no limit to the number of references
  - But use only those that directly support your work (about 30)
- Ensure proper author attribution
  - Author name, *article title*, publication name, publisher, year published, volume and page number, Digital Object Identifier (DOI)



1574 IEEE TRANSACTIONS ON SMART GRID, VOL. 5, NO. 4, JULY 2014

We then have

$$(P_t^{h+}+P_t^{s-})^2-(P_t^{s+}-P_t^{h-})^2+4P_t^{h+}P_t^{s-} < (\hat{P}_t^{s+}-\hat{P}_t^{h-})^2+4\hat{P}_t^{h+}\hat{P}_t^{s-} -(\hat{P}_t^{s+}+\hat{P}_t^{h-})^2. \quad (32)$$

Since $P_t^{h+}-P_t^{h-}=\hat{P}_t^{s+}-\hat{P}_t^{s-}$, we then have $P_t^{s+}<P_t^{h+}$, and $P_t^{s-}<P_t^{h-}$. Because the operational cost is an increasing function of $\{P_t^{s+},P_t^{s-}\}$, we obtain that

$$c_{o/m}(P_t^{s+},P_t^{s-})<c_{o/m}(\hat{P}_t^{s+},\hat{P}_t^{s-}). \quad (33)$$

Therefore the optimal pair $\{P_t^{s+},P_t^{s-}\}$ must satisfy that $P_t^{s+}P_t^{h-}=0$, i.e., only one of P_t^{s+},P_t^{s-} can be non-zero. ■

Peng Yang (S'11) received the B.Sc. degree in electrical engineering from University of Science and Technology, Anhui, China in 2009, and the M.Sc. and Ph.D. degrees in electrical engineering from Washington University in St. Louis, St. Louis, MO, USA, in 2011 and 2014, respectively. His Ph.D. advisor is Dr. Arye Nehorai.

His research interests include statistical signal processing, optimization, machine learning, and compressive sensing, with applications to smart grids.

Arye Nehorai (S'80–M'83–SM'90–F'94) received the B.Sc. and M.Sc. degrees from the Technion, Haifa, Israel, and the Ph.D. degree from Stanford University, Stanford, CA, USA.

He is the Eugene and Martha Lohman Professor and Chair of the Preston M. Green Department of Electrical and Systems Engineering (ESE) at Washington University in St. Louis (WUSTL), St. Louis, MO, USA. Earlier, he was a faculty member at Yale University and the University of Illinois at Chicago.

Dr. Nehorai served as Editor-in-Chief of IEEE TRANSACTIONS ON SIGNAL PROCESSING from 2000 to 2002. From 2003 to 2005 he was the Vice President of the IEEE Signal Processing Society (SPS), the Chair of the Publications Board, and a member of the Executive Committee of this Society. He was the founding Editor of the special columns on Leadership Reflections in *IEEE Signal Processing Magazine* from 2003 to 2006. He has been a Fellow of the IEEE since 1994, the Royal Statistical Society since 1996, and the AAAS since 2012.

Properly cited material

IEEE

Ethics

Types of Misconduct

Conflict of Interest

A financial or other relationship with the publication at odds with the unbiased presentation of data or analysis

Plagiarism

Copying another person's work word for word or paraphrasing without proper citation

Author Attribution

Must be given if you use another author's ideas in your article, even if you do not directly quote a source

Author involvement/ contributions

- Include any and all who have made a substantial intellectual contribution to the work
- Do not include minor contributors

IEEE

Ethical Publishing

- **Avoid plagiarism**
  - Cite and separate verbatim copied material
  - Paraphrase other's text properly, and include citation
  - Credit any ideas from other sources
  - Familiarize yourself with IEEE Policies
- **Author must submit original work that:**
  - Has not appeared elsewhere for publication
  - Is not under review for another publication
  - Cites previous work
  - Indicates how it differs from previously published work
  - Authors MUST **inform the editor** when submitting previously published work

Refer to our Guidelines:
https://www.ieee.org/publications/rights/multi-sub-guidelines-intro.html

IEEE

Where to Publish?

Traditional Journals:

Users/Libraries pay for access

Open Access Journals:

Author pays, free download

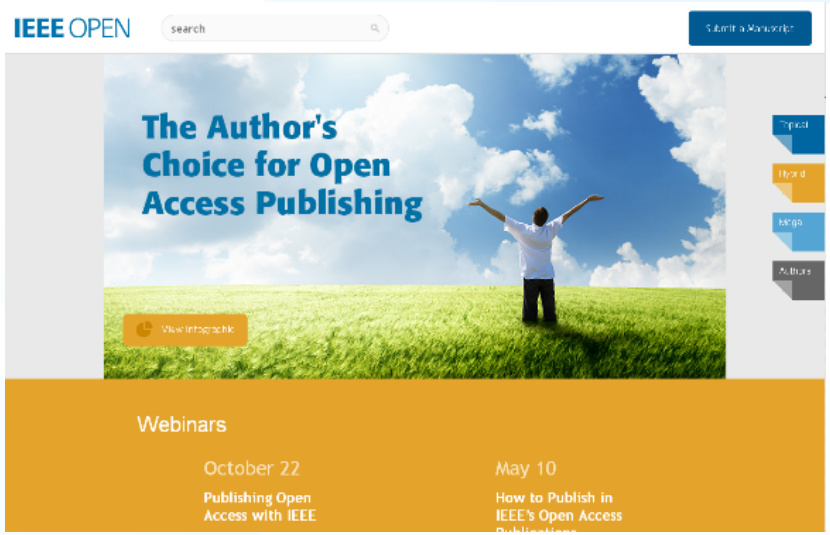
Hybrid Journals:

Most articles traditional, some are open access (author preference)

Open Access with IEEE

Hybrid

- 100+ well-established IEEE publications



Topical Journals

- IEEE Journal of the Electron Devices Society
- IEEE Journal of Translational Engineering in Health and Medicine
- IEEE Power and Energy Technology Systems Journal
- IEEE Photonics Journal
- IEEE Journal on Exploratory Solid-State Computational Devices and Circuits

Multidisciplinary

- IEEE Access

IEEE

Selecting Hybrid Open Access

Traditional Publishing Option:

Requires authors to transfer copyright to IEEE.

For more information see sidebar.

Open Access Publishing Option:

Allows authors' articles to be freely accessed on IEEE Xplore, and requires a payment of an Article Processing Charge.

For more information see sidebar

I agree to pay the Article Processing Charge.

Notice to Authors who have received Wellcome Trust funding

In order to support Wellcome Trust's Open Access policy, all authors who have received funding from Wellcome Trust to cover article processing charges (APC) must select the Open Access option above.

IEEE

Wellcome Trust

- IEEE is a Wellcome-compliant publisher
- Offer CC BY licensing option
- IEEE deposits the final version of the article in PubMed Central immediately upon issue publication without any embargo period

IEEE

Open Access: Emerging Trends

- EU preference is for Open Access: green or gold OA is acceptable
- Open Access deposit accounts gaining traction across EU to help students fund their work
- Authors can now add Funding Agency field to their published work
- Search by Funding Agency field in Advanced Search

Resources:

- IEEE Open site: open.ieee.org
- IEEE Access homepage: ieeeaccess.ieee.org
- OA license options: https://www.ieee.org/publications_standards/publications/oa_license_options.pdf

IEEE

Self-Archiving Policy

- IEEE allows authors to deposit **the *accepted* (not final) version of their paper** (available through the Author Gateway) to their institutional or funding repository, or to post it on their personal websites.

- Our full policy can be found here: http://www.ieee.org/publications_standards/publications/rights/paperversionpolicy.html

Impact Factors

Are we depending too heavily on Impact Factors?

Journal's reputation in the community is important

For new and lesser known journals, look at the reputation of the editorial board

Look at the number of downloads, as IEEE uses this for revenue distribution

Are patent citations present? IEEE includes these in *Xplore*

Next Steps

First Steps

Your research problem must contribute new and important knowledge to your field

- **Conduct a Literature Review**
- Take Notes & Keep Track
- Gather References & Citations
- Draft an Outline

Preparation of Papers for IEEE TRANSACTIONS and JOURNALS (December 2013)

First A. Author, *Fellow, IEEE*, Second B. Author, and Third C. Author, Jr., *Member, IEEE*

***Abstract*—These instructions give you guidelines for preparing papers for IEEE Transactions and Journals. Use this document as a template if you are using Microsoft *Word* 6.0 or later. Otherwise, use this document as an instruction set. The electronic file of your paper will be formatted further at IEEE. Paper titles should be written in uppercase and lowercase letters, not all uppercase. Avoid writing long formulas with subscripts in the title; short formulas that identify the elements are fine (e.g., "Nd–Fe–B"). Do not write "(Invited)" in the title. Full names of authors are preferred in the author field, but are not required. Put a space between authors' initials. Define all symbols used in the abstract. Do not cite references in the abstract. Do not delete the blank line immediately above the abstract; it sets the footnote at the bottom of this column.**

***Index Terms*—Enter key words or phrases in alphabetical order, separated by commas. For a list of suggested keywords, send a blank e-mail to keywords@ieee.org or visit http://www.ieee.org/organizations/pubs/ani_prod/keyword98.txt**

I. Introduction

THIS document is a template for Microsoft *Word* versions 6.0 or later. If you are reading a paper or PDF version of this document, please download the electronic file, TRANS-JOUR.DOC, from the IEEE Web site at http://www.ieee.org/web/publications/authors/transjnl/index.html so you can use it to prepare your manuscript. If you would prefer to use LATEX, download IEEE's LATEX style and sample files from the same Web page. Use these LATEX files for formatting, but please follow the instructions in TRANS-JOUR.DOC or TRANS-JOUR.PDF.

If your paper is intended for a conference, please contact your conference editor concerning acceptable word processor formats for your particular conference.

This paragraph of the first footnote will contain the date on which you submitted your paper for review. It will also contain support information, including sponsor and financial support acknowledgment. For example, "This work was supported in part by the U.S. Department of Commerce under Grant BS123456".

The next few paragraphs should contain the authors' current affiliations, including current addresses and e-mail. For example, F. A. Author is with the National Institute of Standards and Technology, Boulder, CO 80305 USA (e-mail: author@boulder.nist.gov).

S. B. Author, Jr., was with Rice University, Houston, TX 77005 USA. He is now with the Department of Physics, Colorado State University, Fort Collins, CO 80523 USA (e-mail: author@lamar.colostate.edu).

T. C. Author is with the Electrical Engineering Department, University of Colorado, Boulder, CO 80309 USA, on leave from the National Research Institute for Metals, Tsukuba, Japan (e-mail: author@nrim.go.jp).

II. Guidelines For Manuscript Preparation

When you open TRANS-JOUR.DOC, select "Page Layout" from the "View" menu in the menu bar (View | Page Layout), (these instructions assume MS 6.0. Some versions may have alternate ways to access the same functionalities noted here). Then, type over sections of TRANS-JOUR.DOC or cut and paste from another document and use markup styles. The pull-down style menu is at the left of the Formatting Toolbar at the top of your *Word* window (for example, the style at this point in the document is "Text"). Highlight a section that you want to designate with a certain style, then select the appropriate name on the style menu. The style will adjust your fonts and line spacing. Do not change the font sizes or line spacing to squeeze more text into a limited number of pages. Use italics for emphasis; do not underline.

To insert images in *Word*, position the cursor at the insertion point and either use Insert | Picture | From File or copy the image to the Windows clipboard and then Edit | Paste Special | Picture (with "float over text" unchecked).

IEEE will do the final formatting of your paper. If your paper is intended for a conference, please observe the conference page limits.

A. Abbreviations and Acronyms

Define abbreviations and acronyms the first time they are used in the text, even after they have already been defined in the abstract. Abbreviations such as IEEE, SI, ac, and dc do not have to be defined. Abbreviations that incorporate periods should not have spaces: write "C.N.R.S.," not "C. N. R. S." Do not use abbreviations in the title unless they are unavoidable (for example, "IEEE" in the title of this article).

B. Other Recommendations

Use one space after periods and colons. Hyphenate complex modifiers: "zero-field-cooled magnetization." Avoid dangling participles, such as, "Using (1), the potential was calculated." [It is not clear who or what used (1).] Write instead, "The potential was calculated by using (1)," or "Using (1), we calculated the potential."

Use a zero before decimal points: "0.25," not ".25." Use "cm^2," not "cc." Indicate sample dimensions as "0.1 cm × 0.2 cm," not "0.1 × 0.2 cm^2." The abbreviation for "seconds" is "s," not "sec." Use "Wb/m^2" or "webers per square meter," not "webers/m^2." When expressing a range of values, write "7 to 9" or "7–9," not "7~9."

IEEE

Final Steps

Find the right publication and submit your paper

- Locate IEEE Author Tools
- **Identify relevant journals**
- Browse conference calls for papers
- Submit your paper

Find the right publication and submit your paper

- Identify relevant journals
- Browse conference calls for papers
- **Submit your paper**

Identify yourself with ORCID

ORCID is a unique, persistent identifier which helps authors:

- Ensure work is discoverable and connected to them throughout career (including moves and name changes)
- Minimize time spent entering repetitive information for manuscript submissions and grant applications
- Eliminate name ambiguity and ensure proper attribution

IEEE requires ORCIDs for all corresponding authors

More info at www.orcid.org

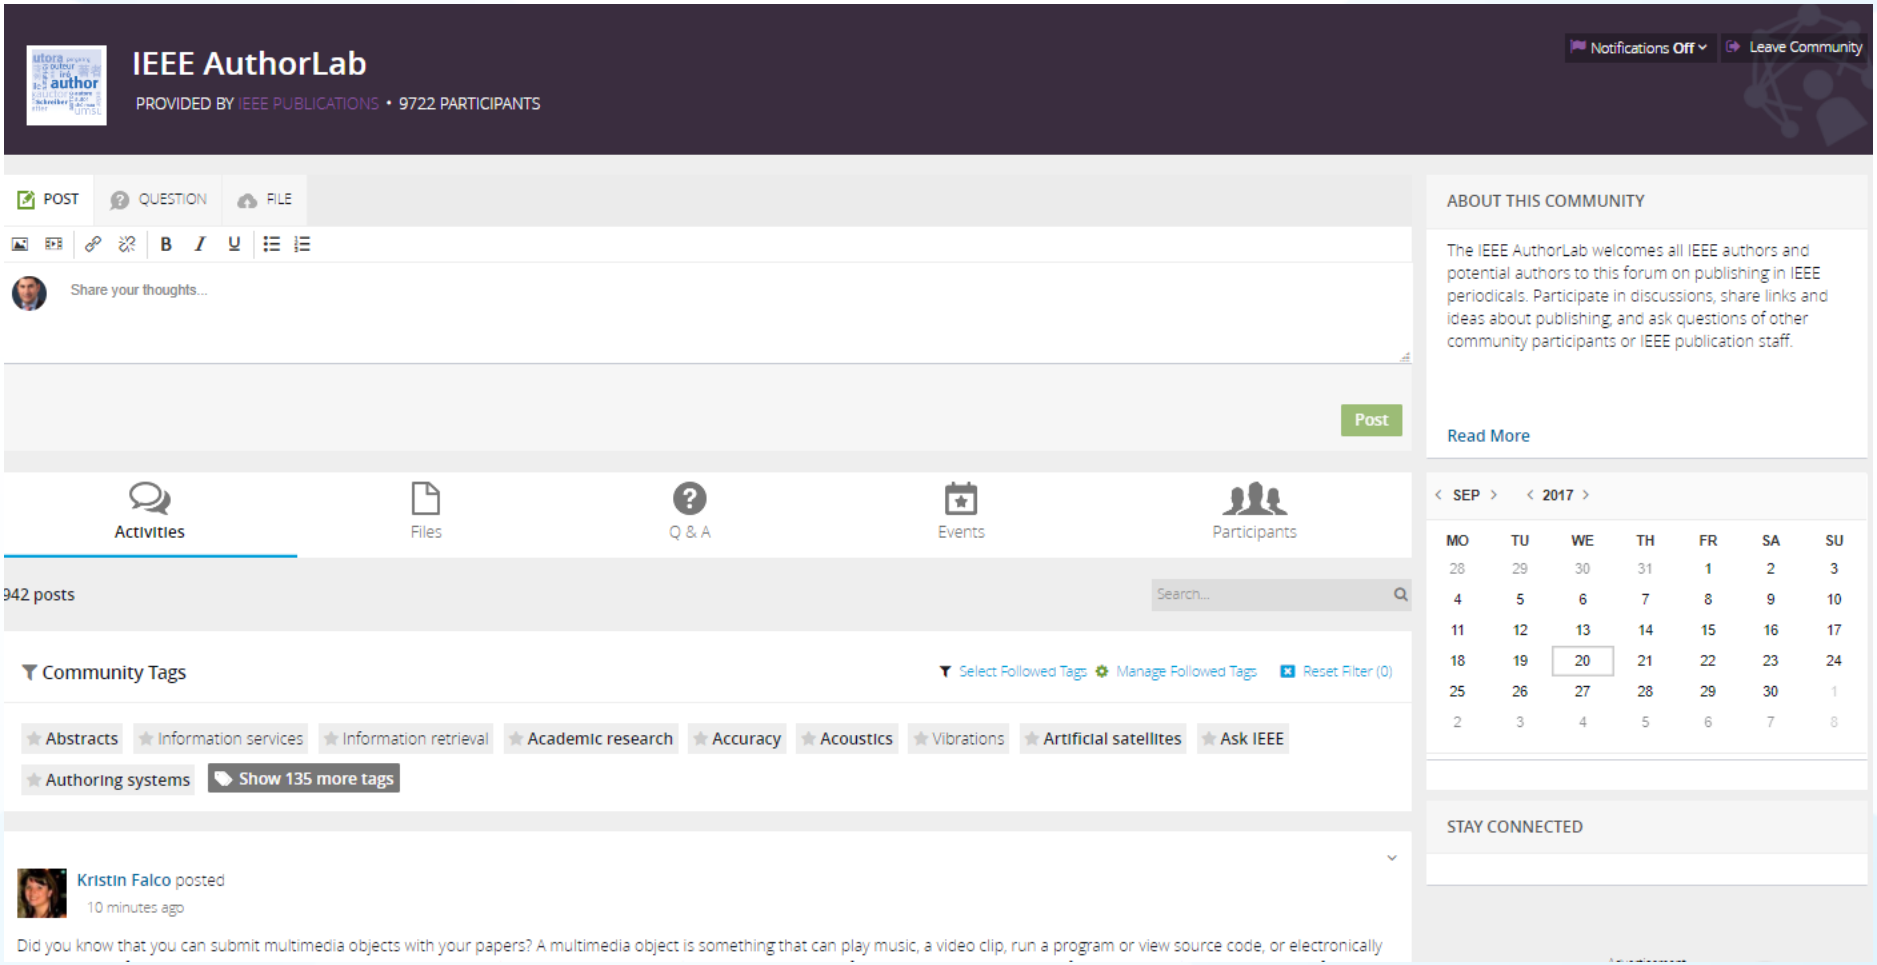
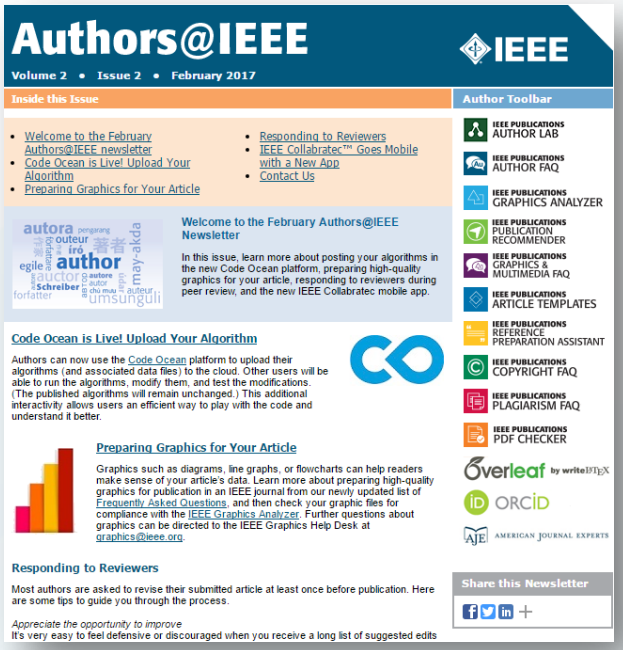
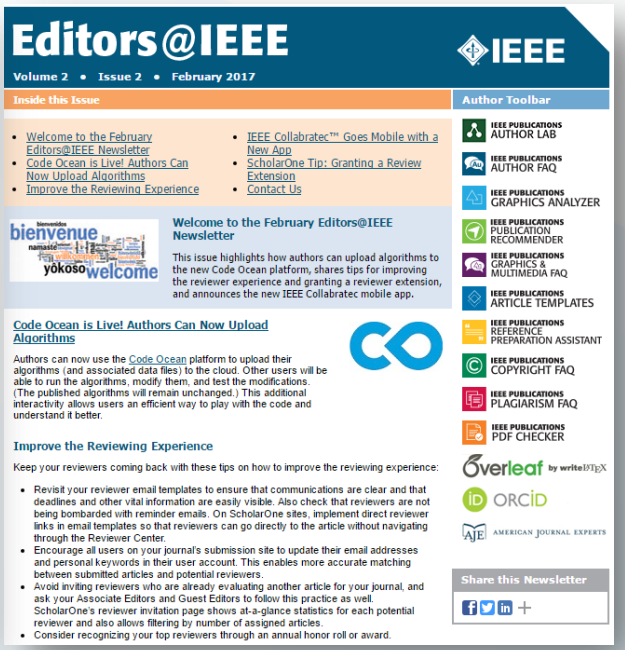
Author Lab in IEEE Collabratec: Additional support and help



Author and Editor Newsletters

- Monthly distribution
- 75k+ subscribers, few unsubscribers
- Author toolbar at the right of every issue
- Sign up at http://ieeeauthorcenter.ieee.org

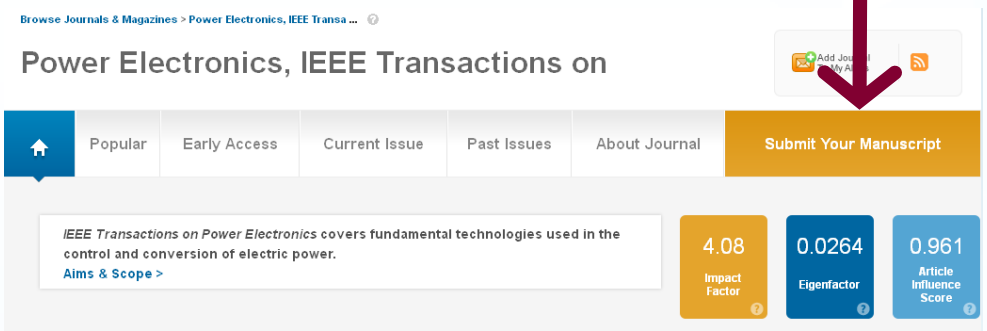




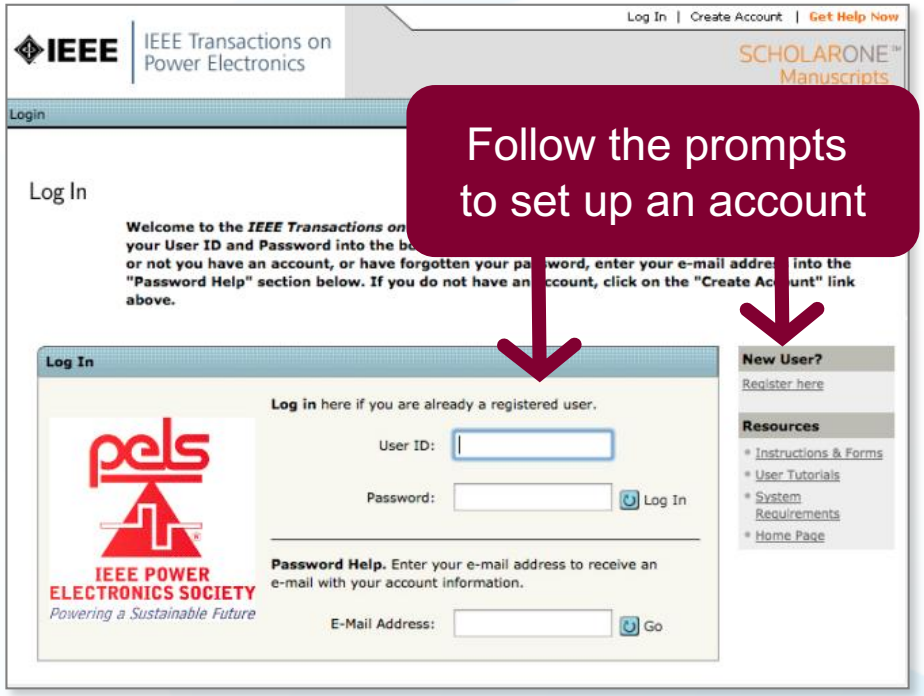
IEEE

Journal paper submission is easy through IEEE *Xplore*

Click “Submit a Manuscript”



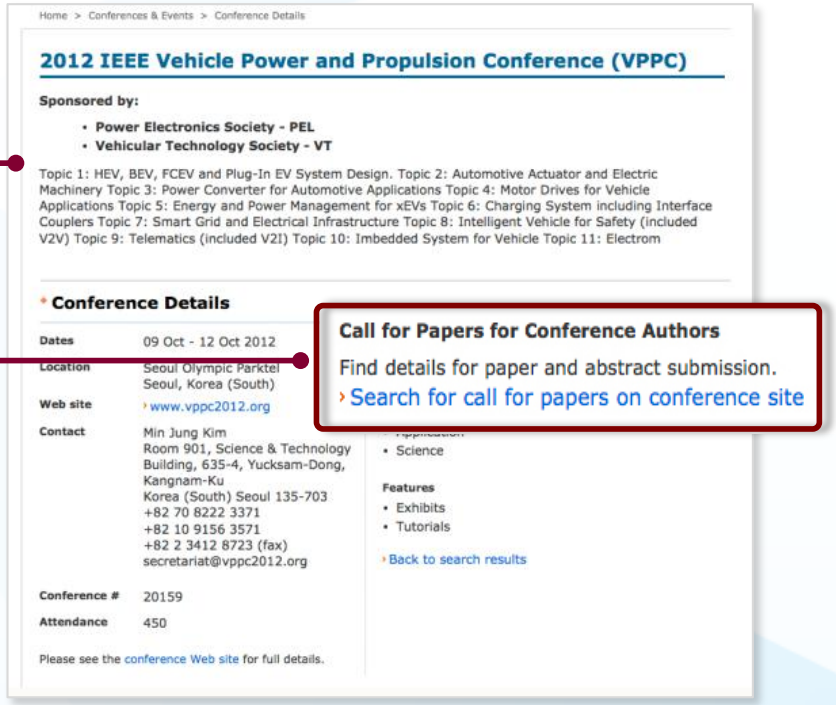
Follow the prompts to set up an account



IEEE

Use conference site (not IEEE *Xplore*) to submit to a conference

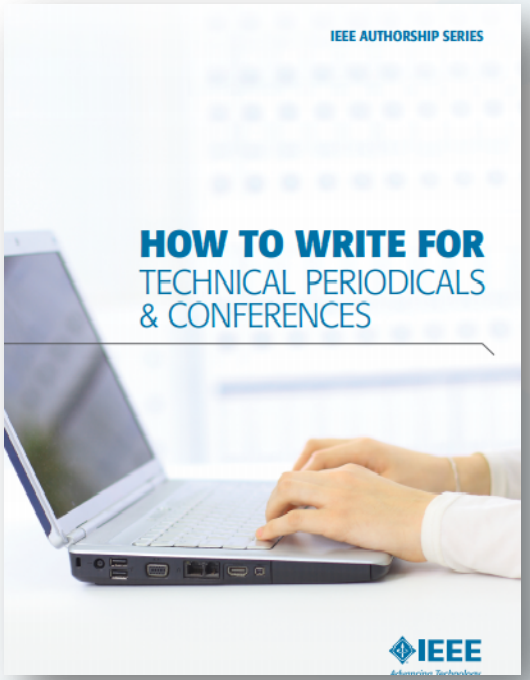
For complete information, see the Call for Papers for the conference in question.



Each IEEE sponsored conference has its own requirements for publishing.

IEEE Author Guide Always Available

- Authors learn how to prepare, write, and submit quality technical articles
- Can be downloaded
- Includes embedded links to information, forms, etc.



For more information or to download: https://www.ieee.org/publications_standards/publications/authors/publishing_benefits/index.html?WT.mc_id=pb_ben_pub

IEEE

eBook: The IEEE Guide to Writing in the Engineering and Technical Fields

- Brought to you by Wiley-IEEE Press
- Written for engineers, technical professionals, scientists, researchers, teachers, and students
- A tool to help written work more clear and better targeted for sharing knowledge
- Available for download: https://ieeexplore.ieee.org/xpl/bkabstractplus.jsp?bkn=8052361

To Sum Up…

- Journal or Conference? Consult the Publication Recommender: publication-recommender.ieee.org/home
- DO NOT submit to multiple publications at once
- Keep your writing clear and concise
- Use images, charts, and graphs to illustrate your research and methodology
- Open Access homepage: open.ieee.org
- Register for your free ORCiD ID: https://orcid.org
- Leverage the features of IEEE *Xplore* and the free IEEE *Xplore* Personal Account to help you during your literature review
- Author Center: ieeeauthorcenter.ieee.org
- Questions? Need help? Contact the Editor in Chief early and often!
