IEEE

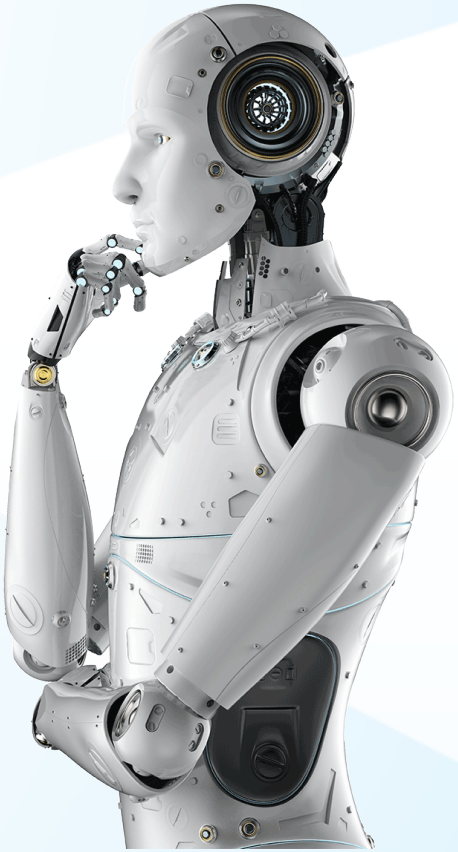

IEEE: Who, What, Why?

Who is IEEE?
World's leading professional association dedicated to the practicing engineer. Over 417,000 members in 160 countries. **Mission: advancing technology for humanity.**

What we do?
We publish the top-cited science and technology research in the field, most notably our journals, conferences, and standards.

Who do we serve?
Our publications are made available to academic, corporate, and government organizations worldwide via the IEEE *Xplore* Digital Library

Why you need IEEE *Xplore?*
IEEE *Xplore* helps end users save time and money by accelerating their R&D efforts and getting research and products to market faster.

IEEE

About IEEE *Xplore*

The IEEE *Xplore* Digital Library is your gateway to a third of the world's technical literature, covering a wide variety of disciplines.

- Over 4.5 million full-text documents
- Approximately 20,000 new documents added to IEEE *Xplore* each month
- More than 25 full years of IEEE journals, conference proceedings, and standards (back to 1988), plus select content dating to 1872
- 192 IEEE journals, magazines, and transactions
- Proceedings from over 1,700 IEEE and IET conference titles
- 30+ IET journals and magazines
- Access to the archive of Nokia Bell Labs Technical Journal
- More than 11 million downloads per month
- Over 4 million unique users

https://ieeexplore.ieee.org

IEEE

IEEE Covers All Areas of Technology

More than just electrical engineering & computer science

- Aerospace & Defense
- Automotive Engineering
- Biomedical Engineering
- Biometrics
- Circuits & Systems
- Cloud Computing
- Communications
- Computer Software
- Electronics
- Energy
- Engineering
- Imaging
- Information Technology
- Medical Devices
- Nanotechnology
- Optics
- Petroleum & Gas
- Power Electronics
- Power Systems
- Robotics & Automation
- Semiconductors
- Smart Grid
- Wireless Broadband

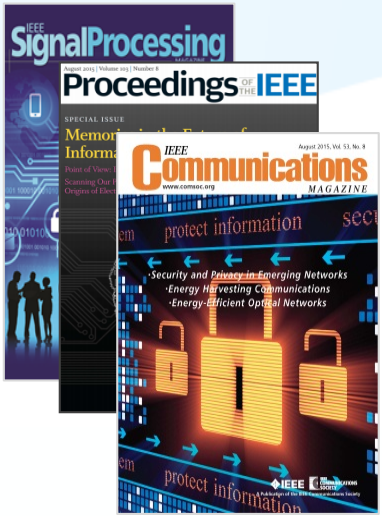

…and many more

IEEE Quality Makes an Impact

Latest studies reinforce that the top cited publications in the world are from IEEE

- The top 20 journals in EE*
- 18 of the top 20 journals in Telecommunications
- IEEE has the #1 cited journals in Computer Hardware, Artificial Intelligence, Automation & Control, Information Systems, and Remote Sensing
- IEEE Access has an impact factor of 4.098 (up from 3.55)
- Cited in patents 3x more than any other publisher**

* Based on the Clarivate Analytics Journal Citation Report study released June 2019

** Source: 1790 Analytics

IEEE

New IEEE Journals Coming in 2020

These new journal titles* will soon be available and accessible via subscription:

- IEEE Journal of Emerging and Selected Topics in Industrial Electronics
- IEEE Journal on Selected Areas in Information Theory
- IEEE Transactions on Technology and Society

**Please note this is a tentative list and is subject to change.*

All included in an IEL subscription

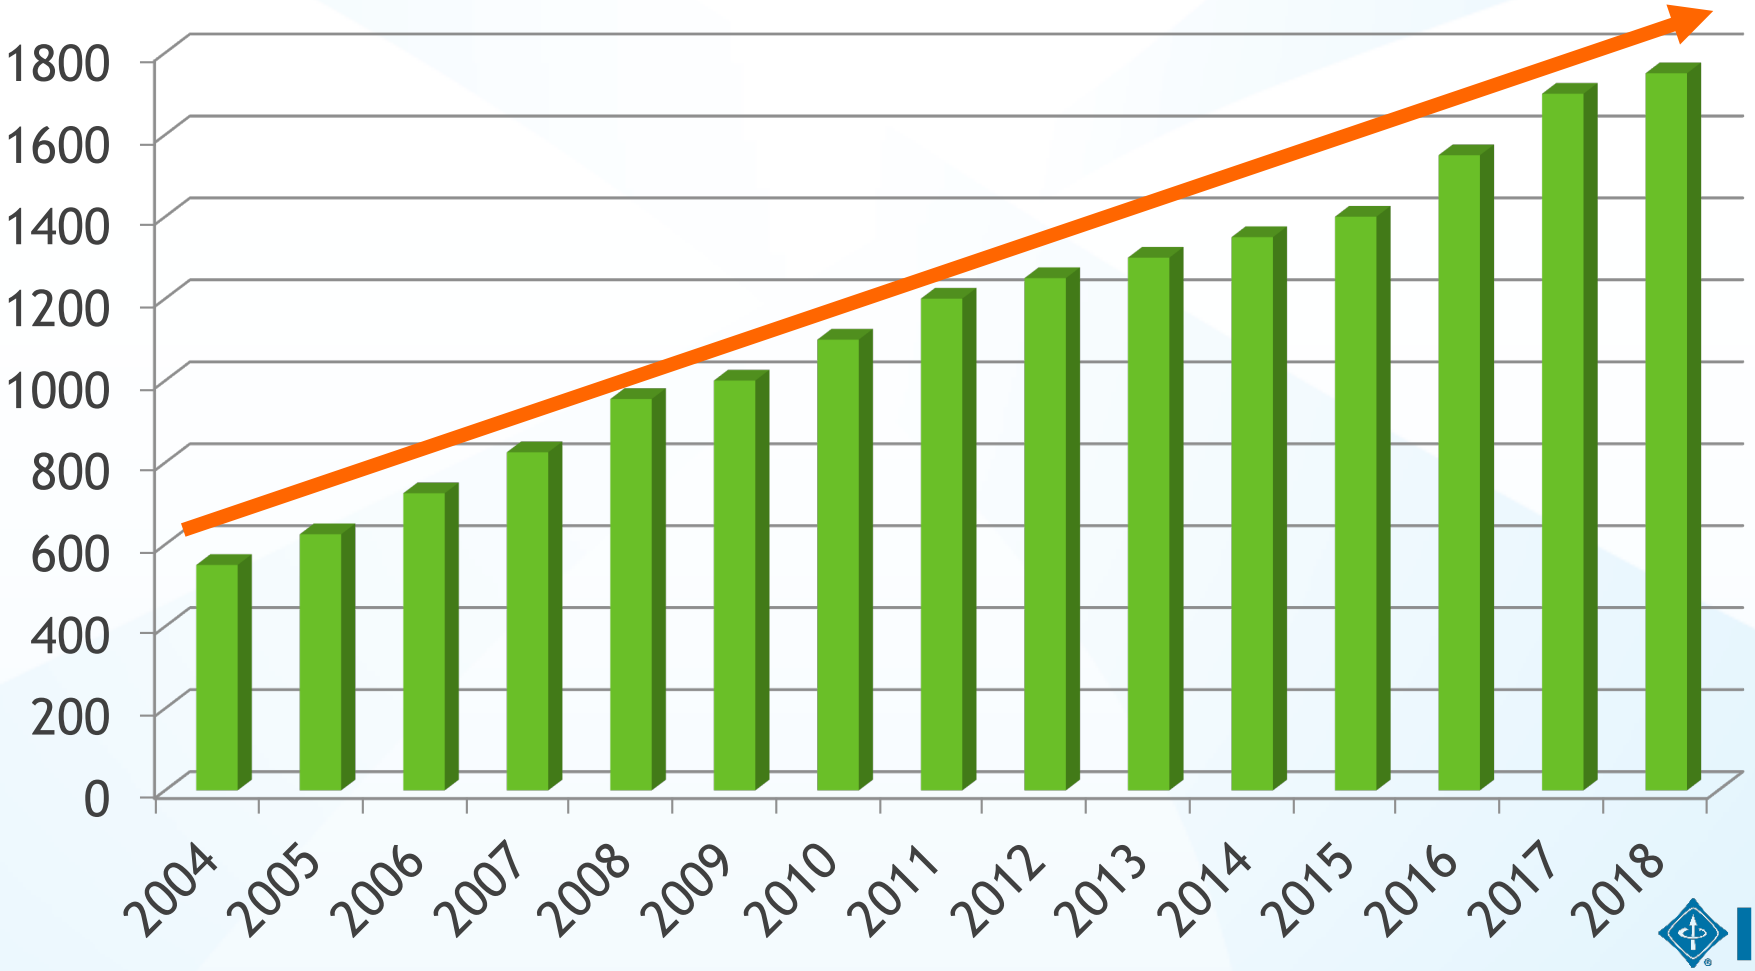

For a complete title listing, go to: http://ieeexplore.ieee.org/xpl/opacjrn.jsp

IEEE

The IEEE conference collection continues to grow

Over 3 million total papers in all in IEEE *Xplore*

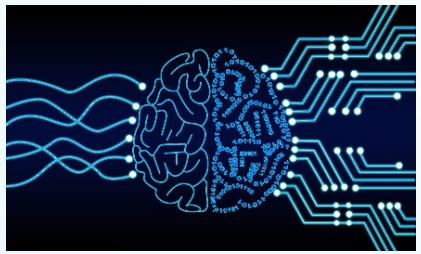

IEEE

IEEE eLearning Library

The premier online collection of online continuing professional education courses for technical professionals

On-Demand Professional Development

- Online, self-paced courses designed to keep engineers and technical professionals up-to-date on core and emerging technologies and trends, leadership skills, and more.
- Courses on latest technologies, taught by the world's leading experts
- Peer reviewed by IEEE societies and experts, as well as faculty from renowned universities and corporations worldwide

Cost Effective and Convenient

- IEEE eLearning Library makes it possible to train your entire technical staff conveniently, wherever they are, for one low price
- Learners earn CEUs/PDHs upon successful completion of courses to maintain professional licenses

IEEE

The *MyXplore* Smartphone App

IEEE research anytime anywhere!

- Added convenience for current and new IEEE *Xplore* users
- IEEE *Xplore* search capability
- Mobile-friend search results and full-text articles
- Daily notifications of new IEEE *Xplore* content that matches user's expressed areas of interest
- Works with login for FREE IEEE *Xplore* Personal Account
- Now available at:

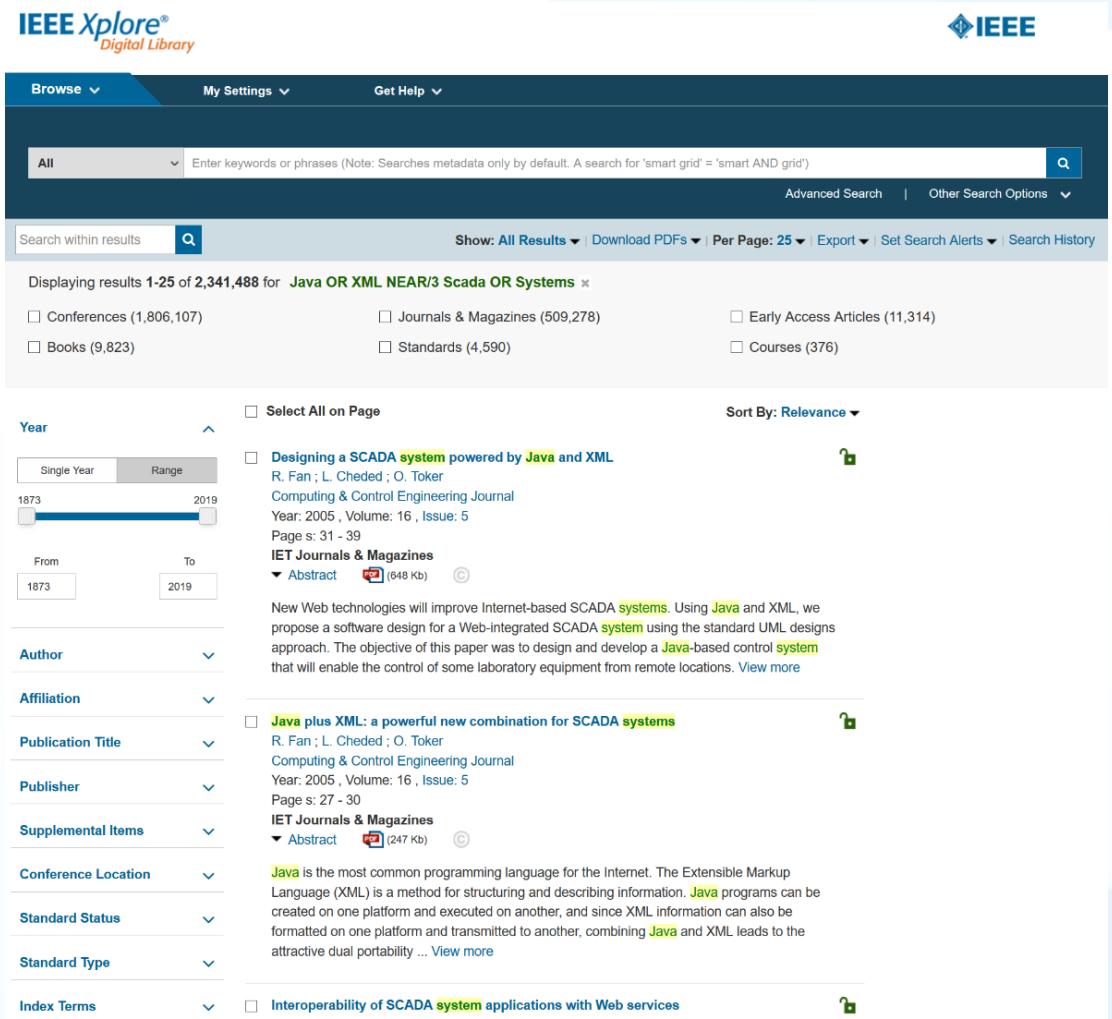

Download on the App Store

GET IT ON Google Play

New Search Technology

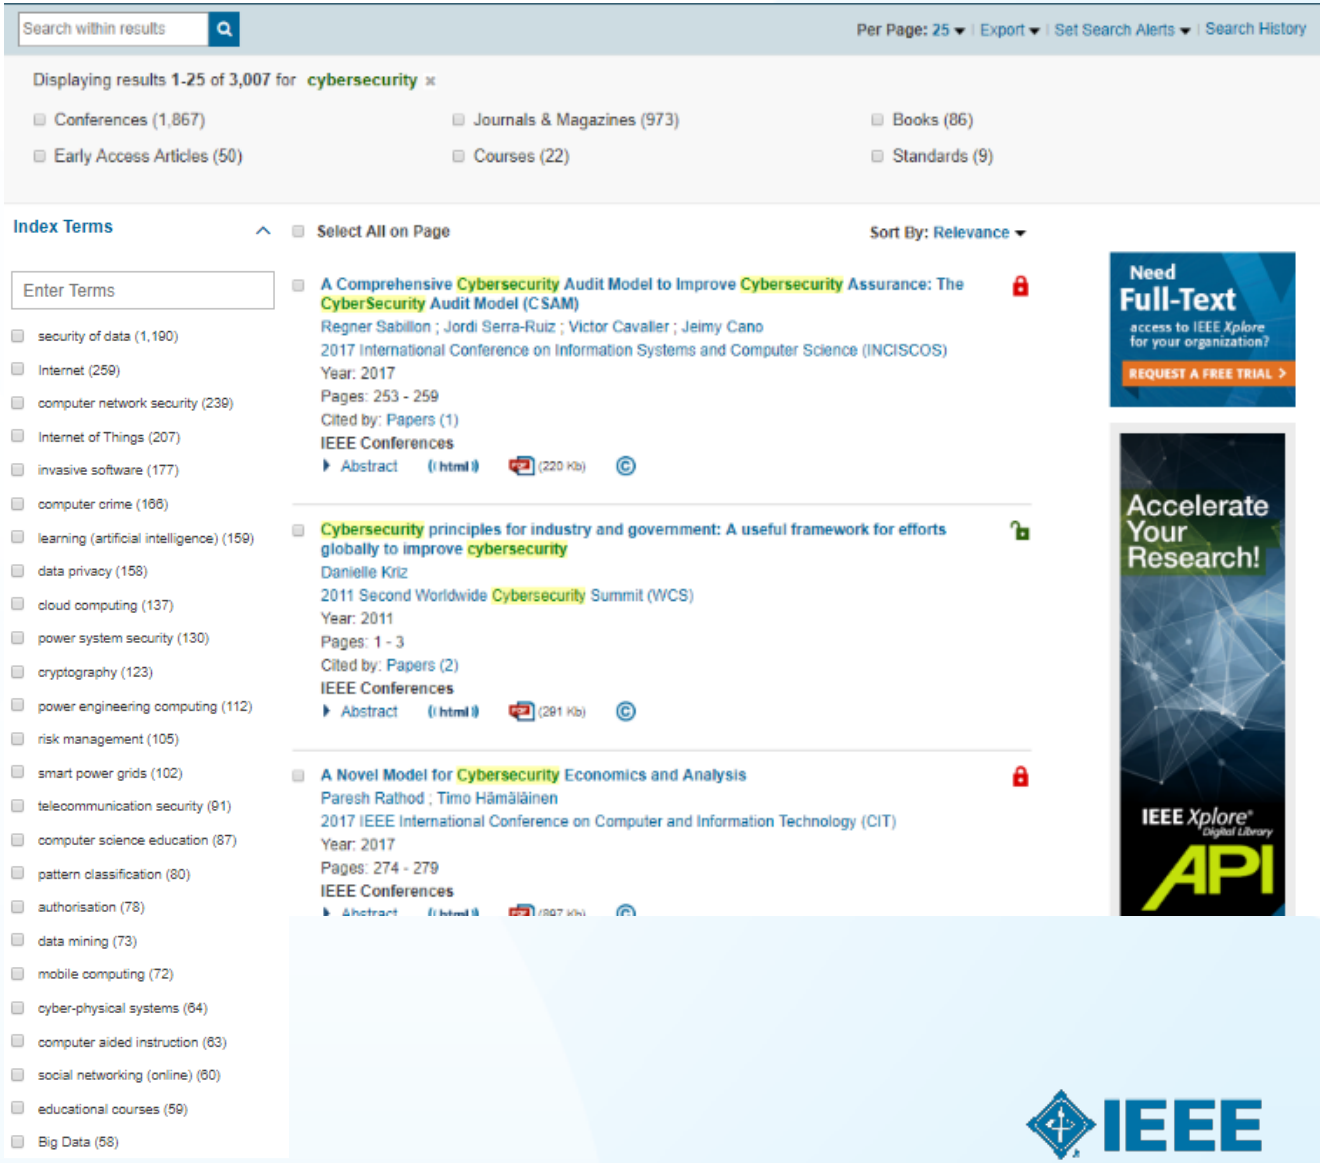

- Better suited for variety of digital content types
- Ability to perform advanced searches via global search box
- Stemming within proximity searches
- Wildcards within phrased searches
- Proximity searches (A OR B) NEAR/3 (C OR D)
- Term highlighting
- Foundation for future IEEE *Xplore* platform capabilities

IEEE

Narrow search results
by Inspec Index Terms

IEEE

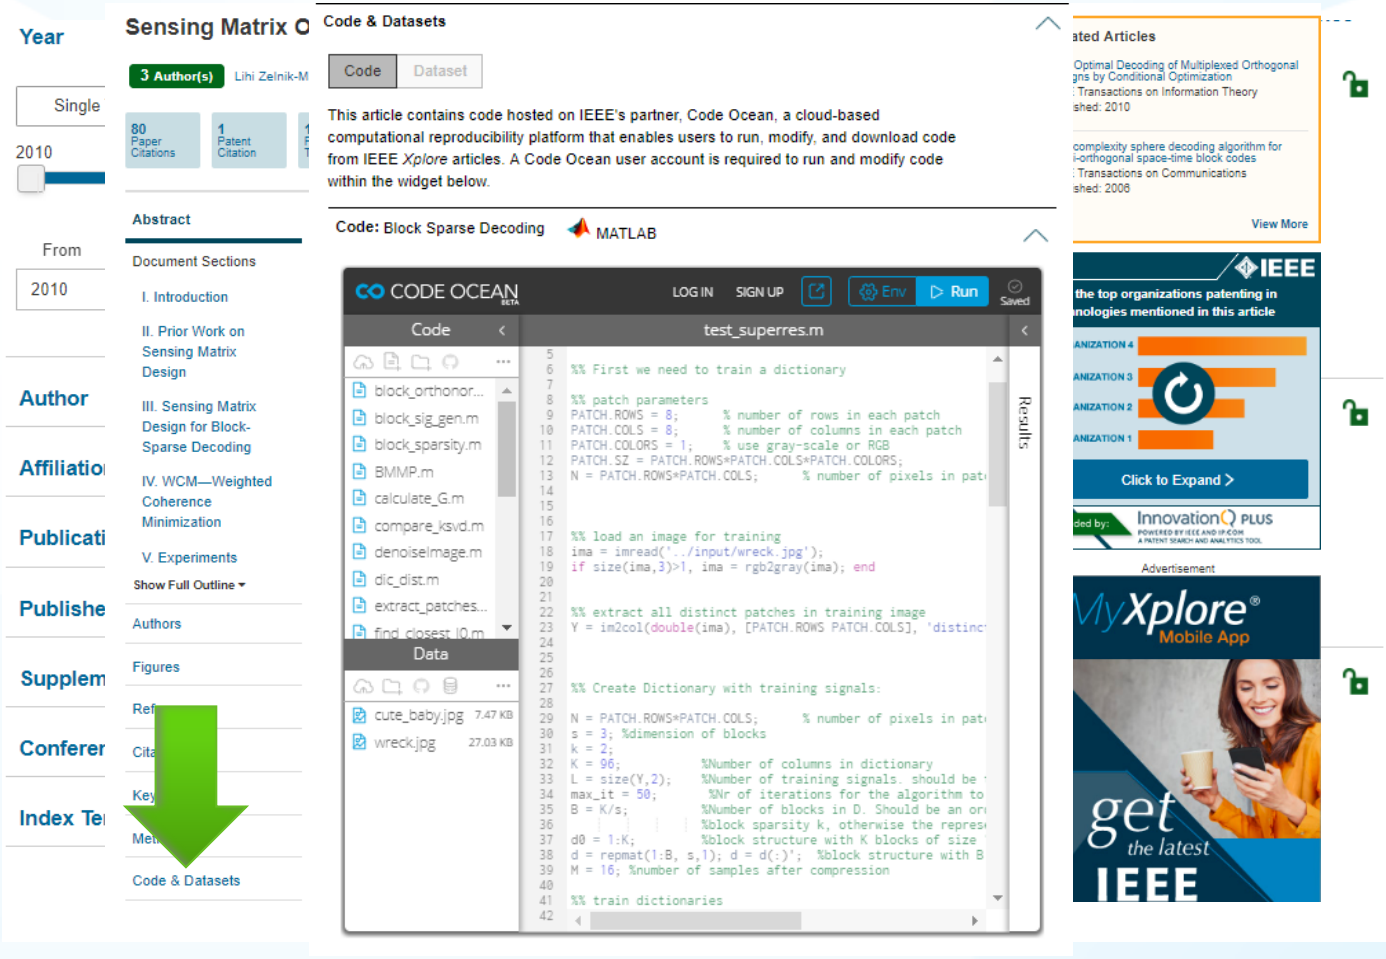

Author Detail Pages

- Helps authors promote their published works in IEEE *Xplore*
- Publically available summary of research activities
- Metrics on author's total publications & history
- Links to co-authors info pages
- Consolidated list of author's publications in IEEE *Xplore*

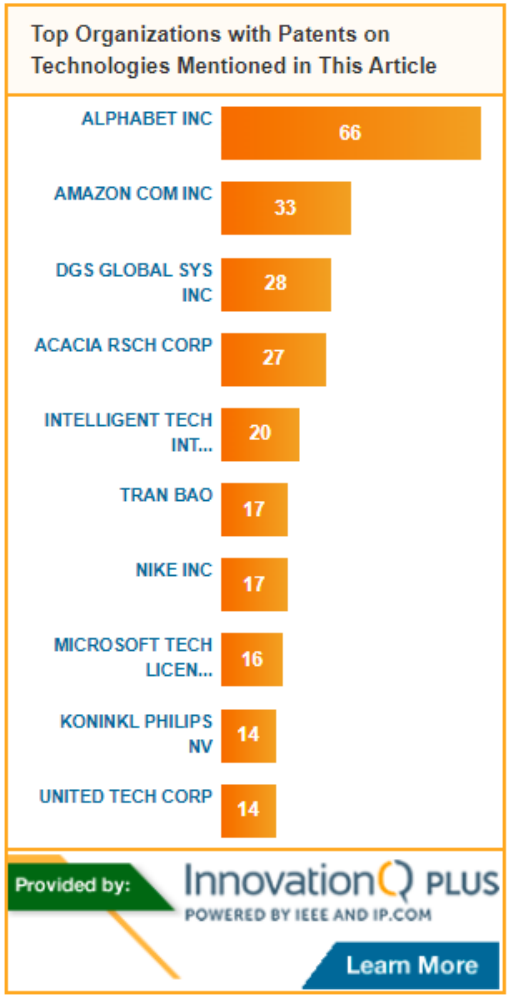

Code Ocean: View & Run Code in IEEE *Xplore*

Allowing users to leverage the tools of Code Ocean right in IEEE *Xplore* (without leaving the site). Users can perform key functions within the module such as download files and run algorithms.

Understanding the Technology Landscape with InnovationQ Plus

Run a semantic search across US patents on the full text of a journal article, conference paper or standard to identify the top organizations patenting in technologies discussed in the document

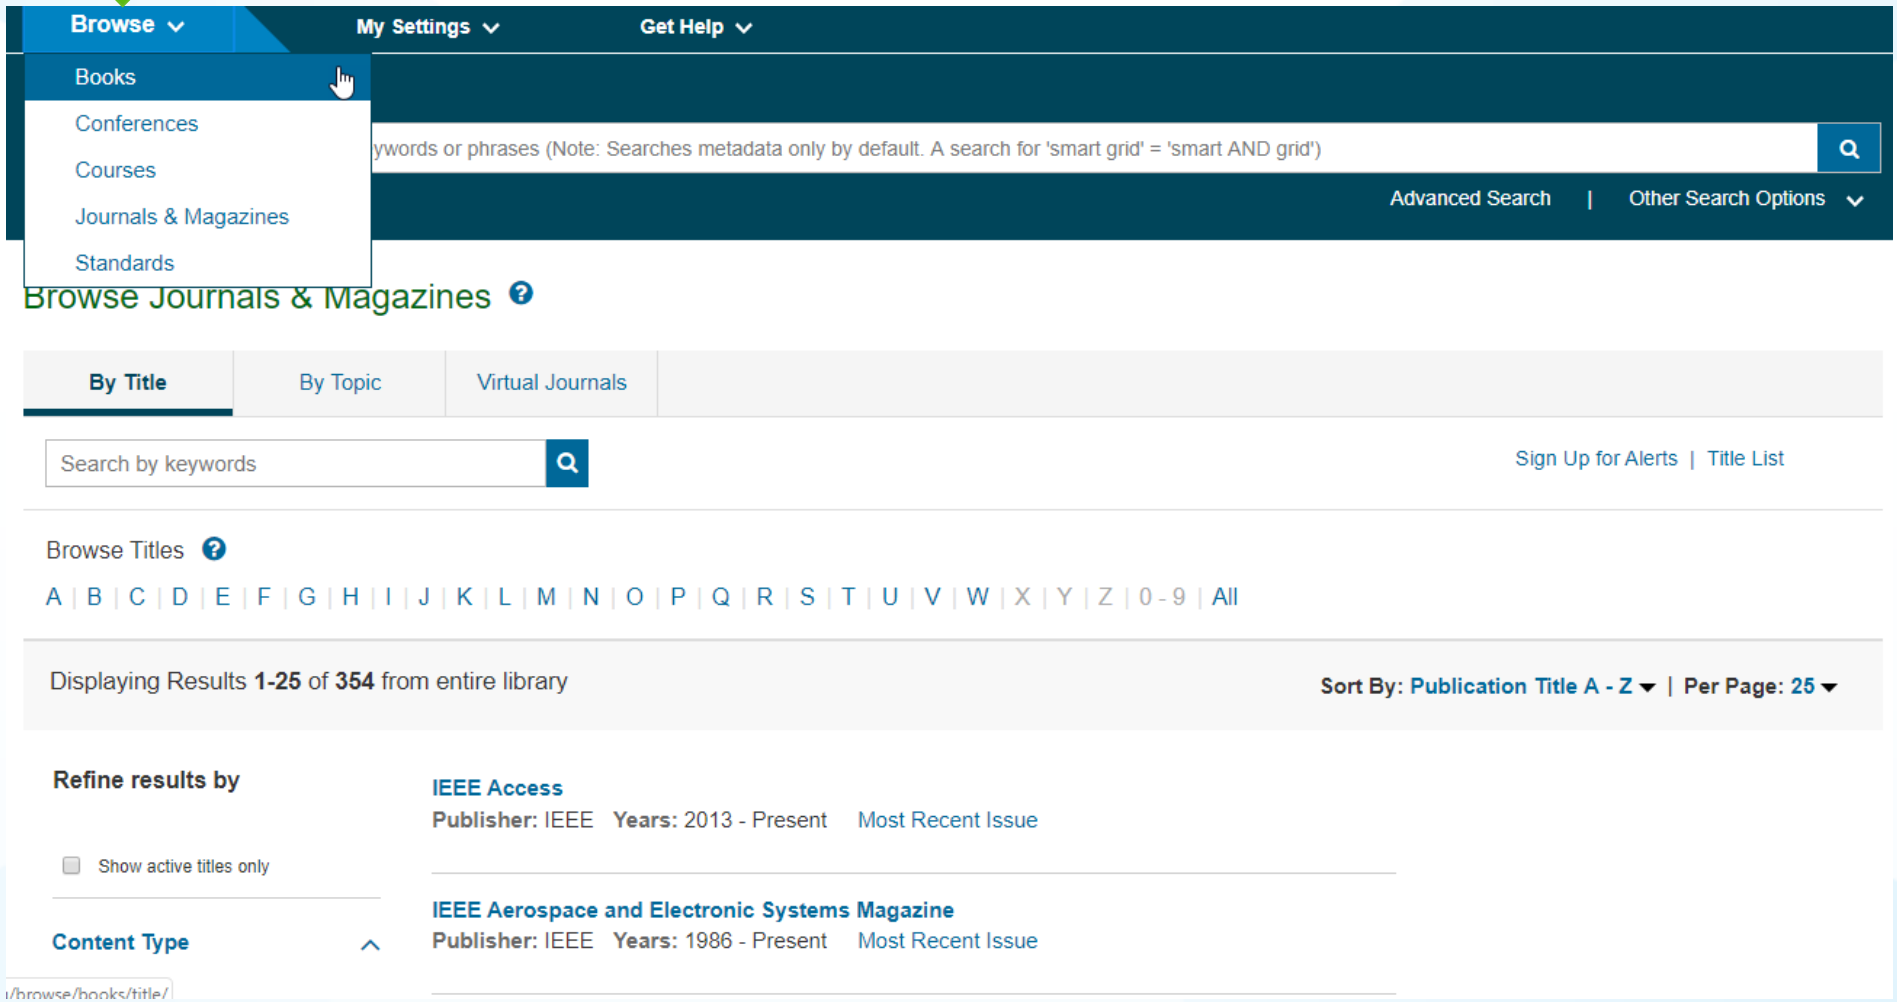

IEEE

IEEE *Xplore:* An Enhanced Search Experience

IEEE

Browsing the Table of Contents

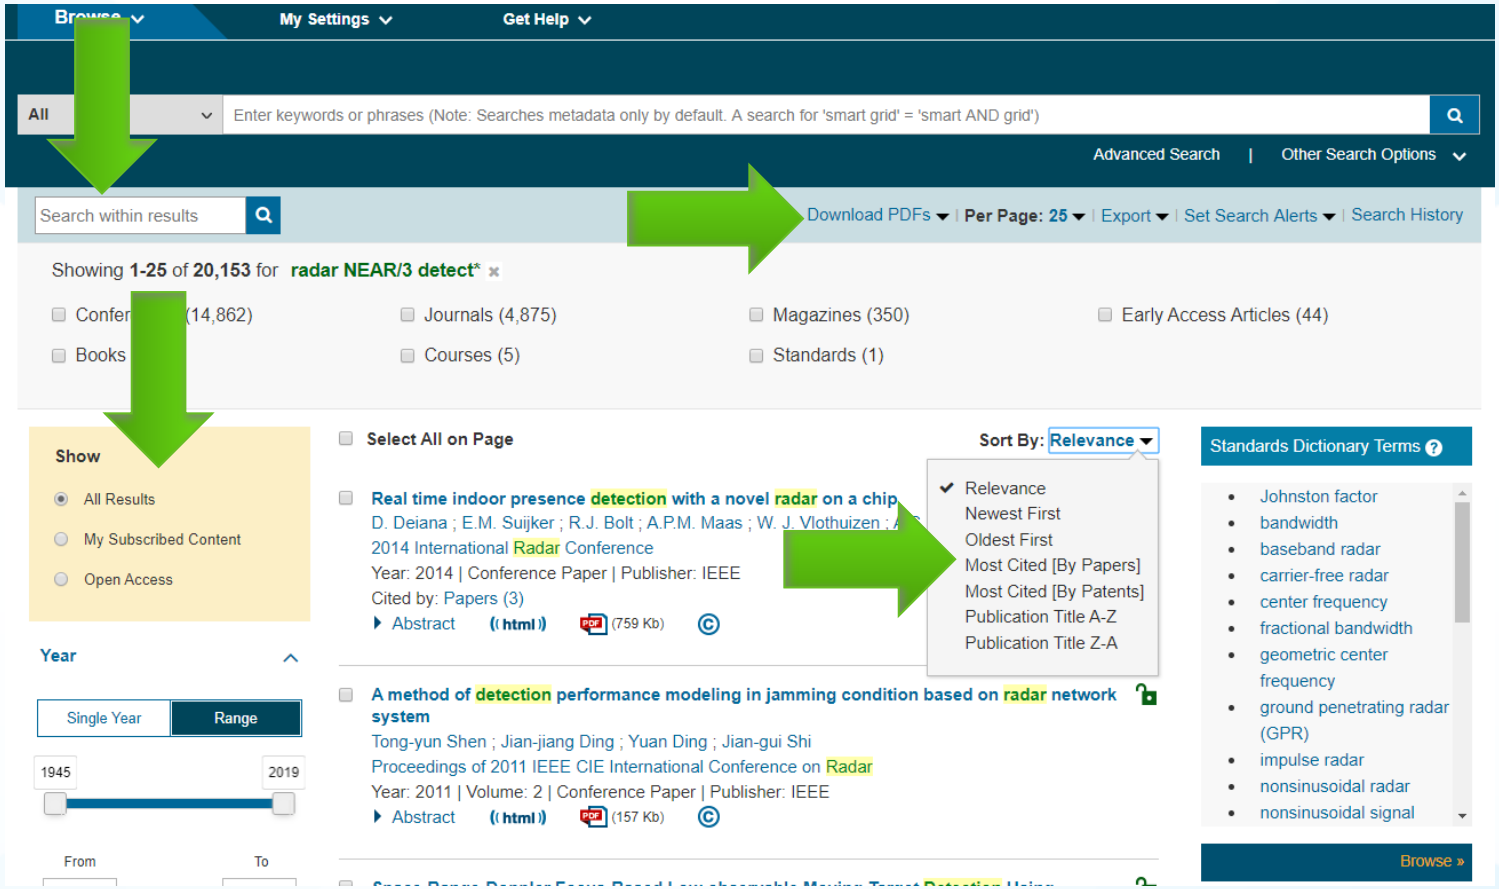

Support for Advanced Searchers: Basic Search

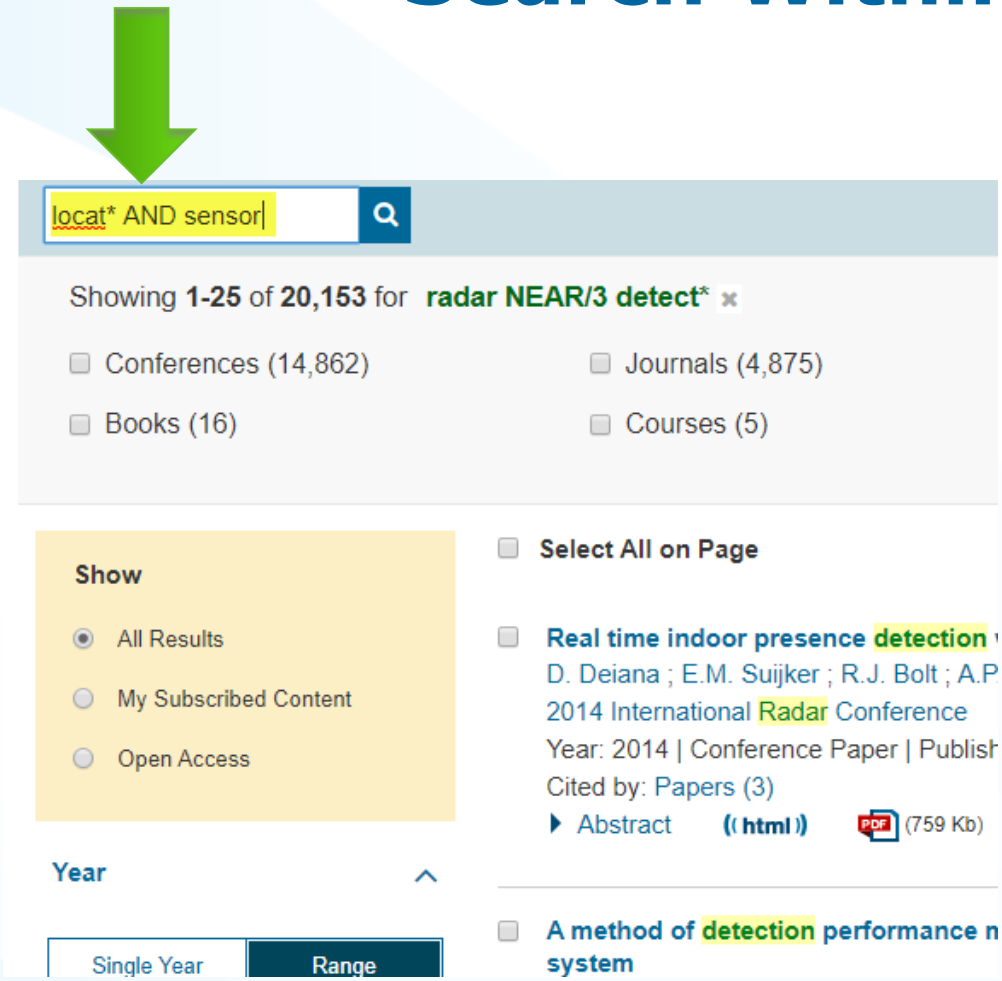

- Basic Search will search **METADATA ONLY**
- Case insensitive and automatic stemming
- Searches for British and US spellings in English. Use wildcards for greater precision.
- Boolean, Proximity, and Field Searching allowed (operators MUST be in all ALL CAPS)
- Wildcards supported: (* and ?)
- Wildcards supported in phrased searches and with proximity operators
- Complex Boolean queries can be nested in proximity statements. **Example:** (A or B) NEAR/5 (C or D).

Search Results and Refinements

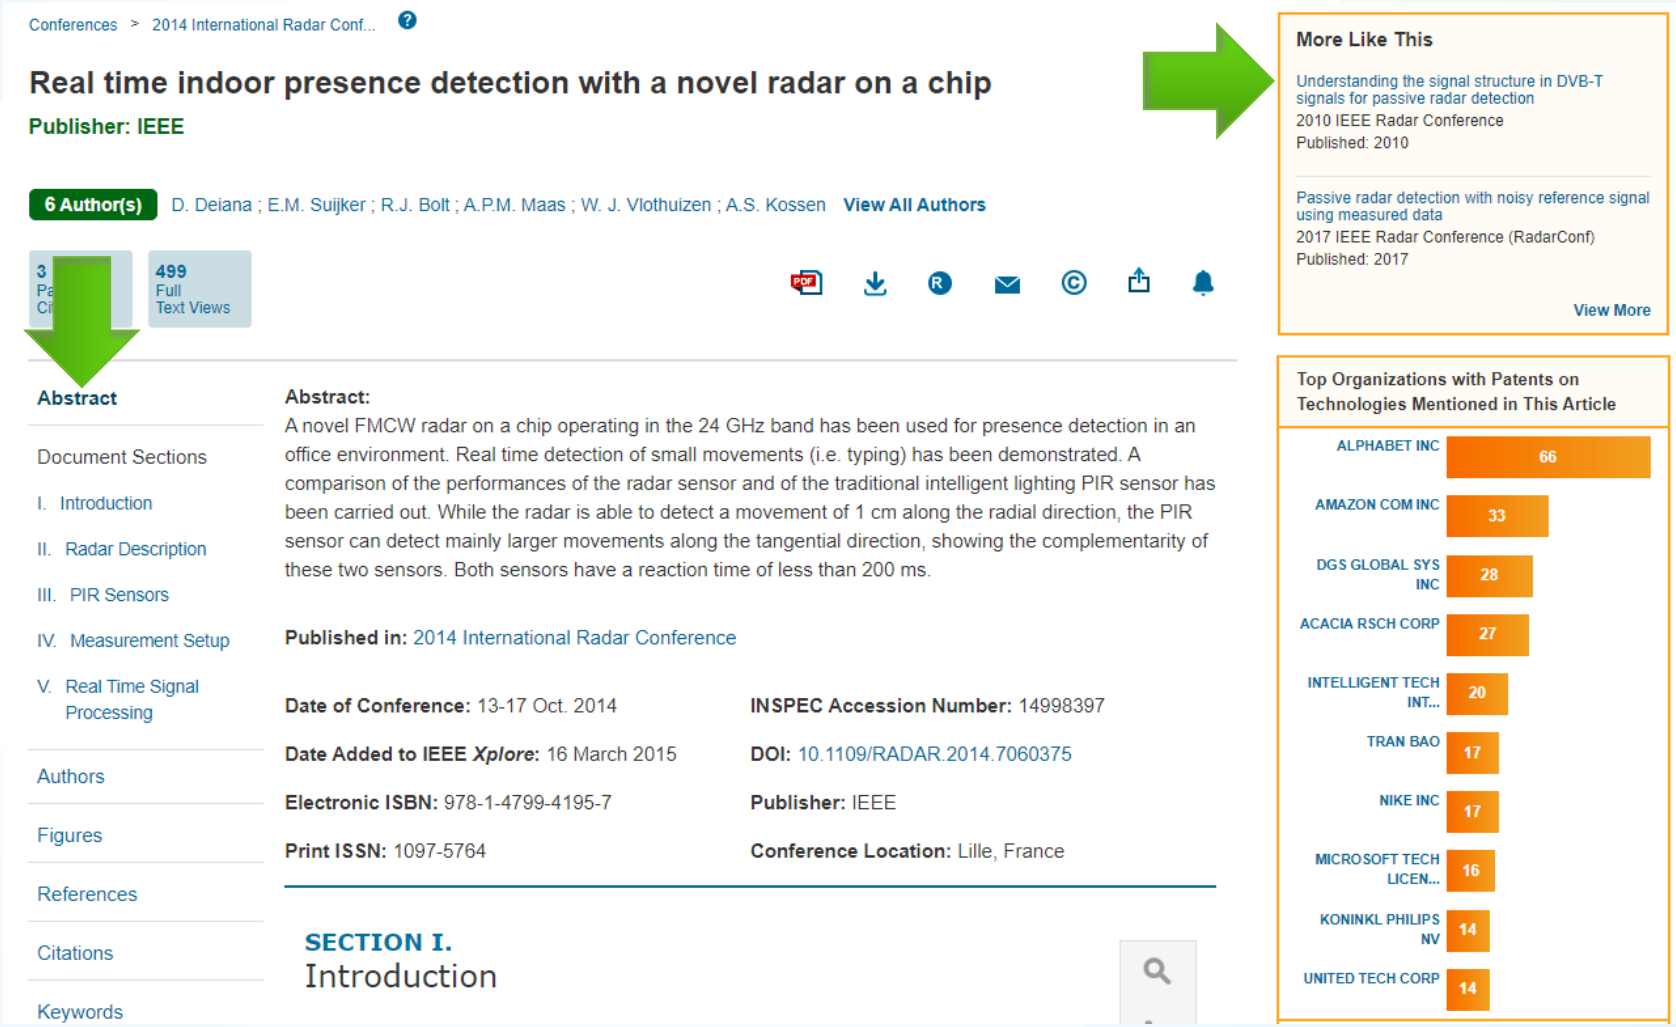

- Boolean and Proximity Operators can now be used in Search Within Results from the search result page.
- Field Commands can now be used in Search Within Results.
- There is a maximum of 5 wildcards per search in IEEE *Xplore*. Search Within Results allows users to add 1 extra wildcard to the search.

Search Within Results

- Boolean and Proximity Operators can now be used in Search Within Results from the search result page.
- Field Commands can now be used in Search Within Results.
- There is a maximum of 5 wildcards per search in IEEE *Xplore*. Search Within Results allows users to add 1 extra wildcard to the search.

Advanced Search: Full Text and Field Searching

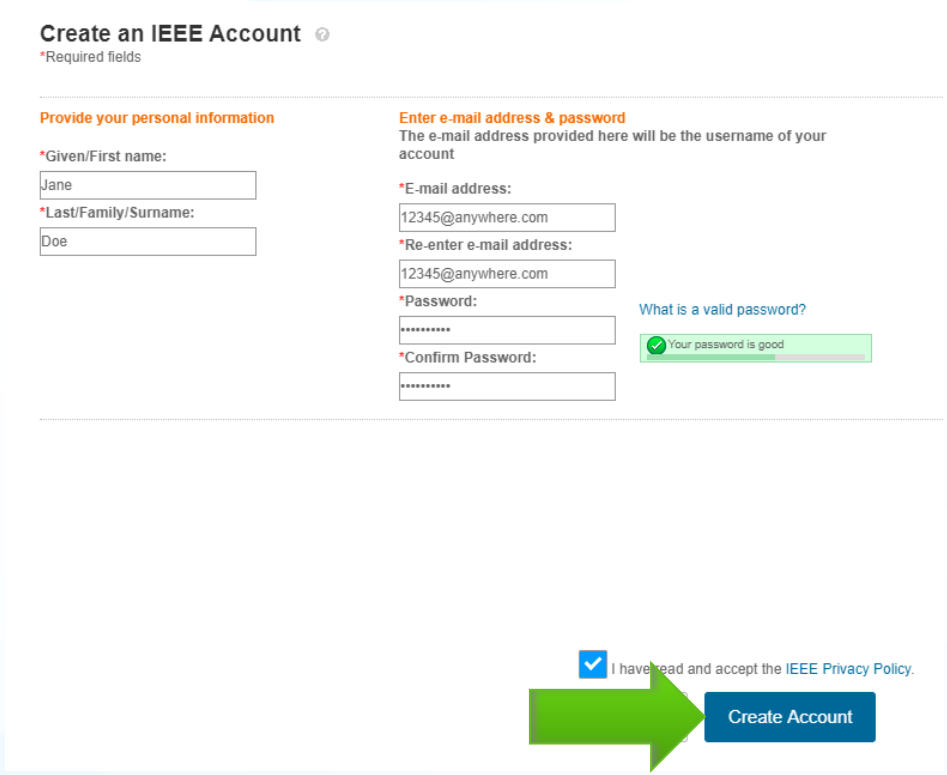

Leverage both Full Text & Metadata and Full Text Only searching across multiple search strings

Command Search

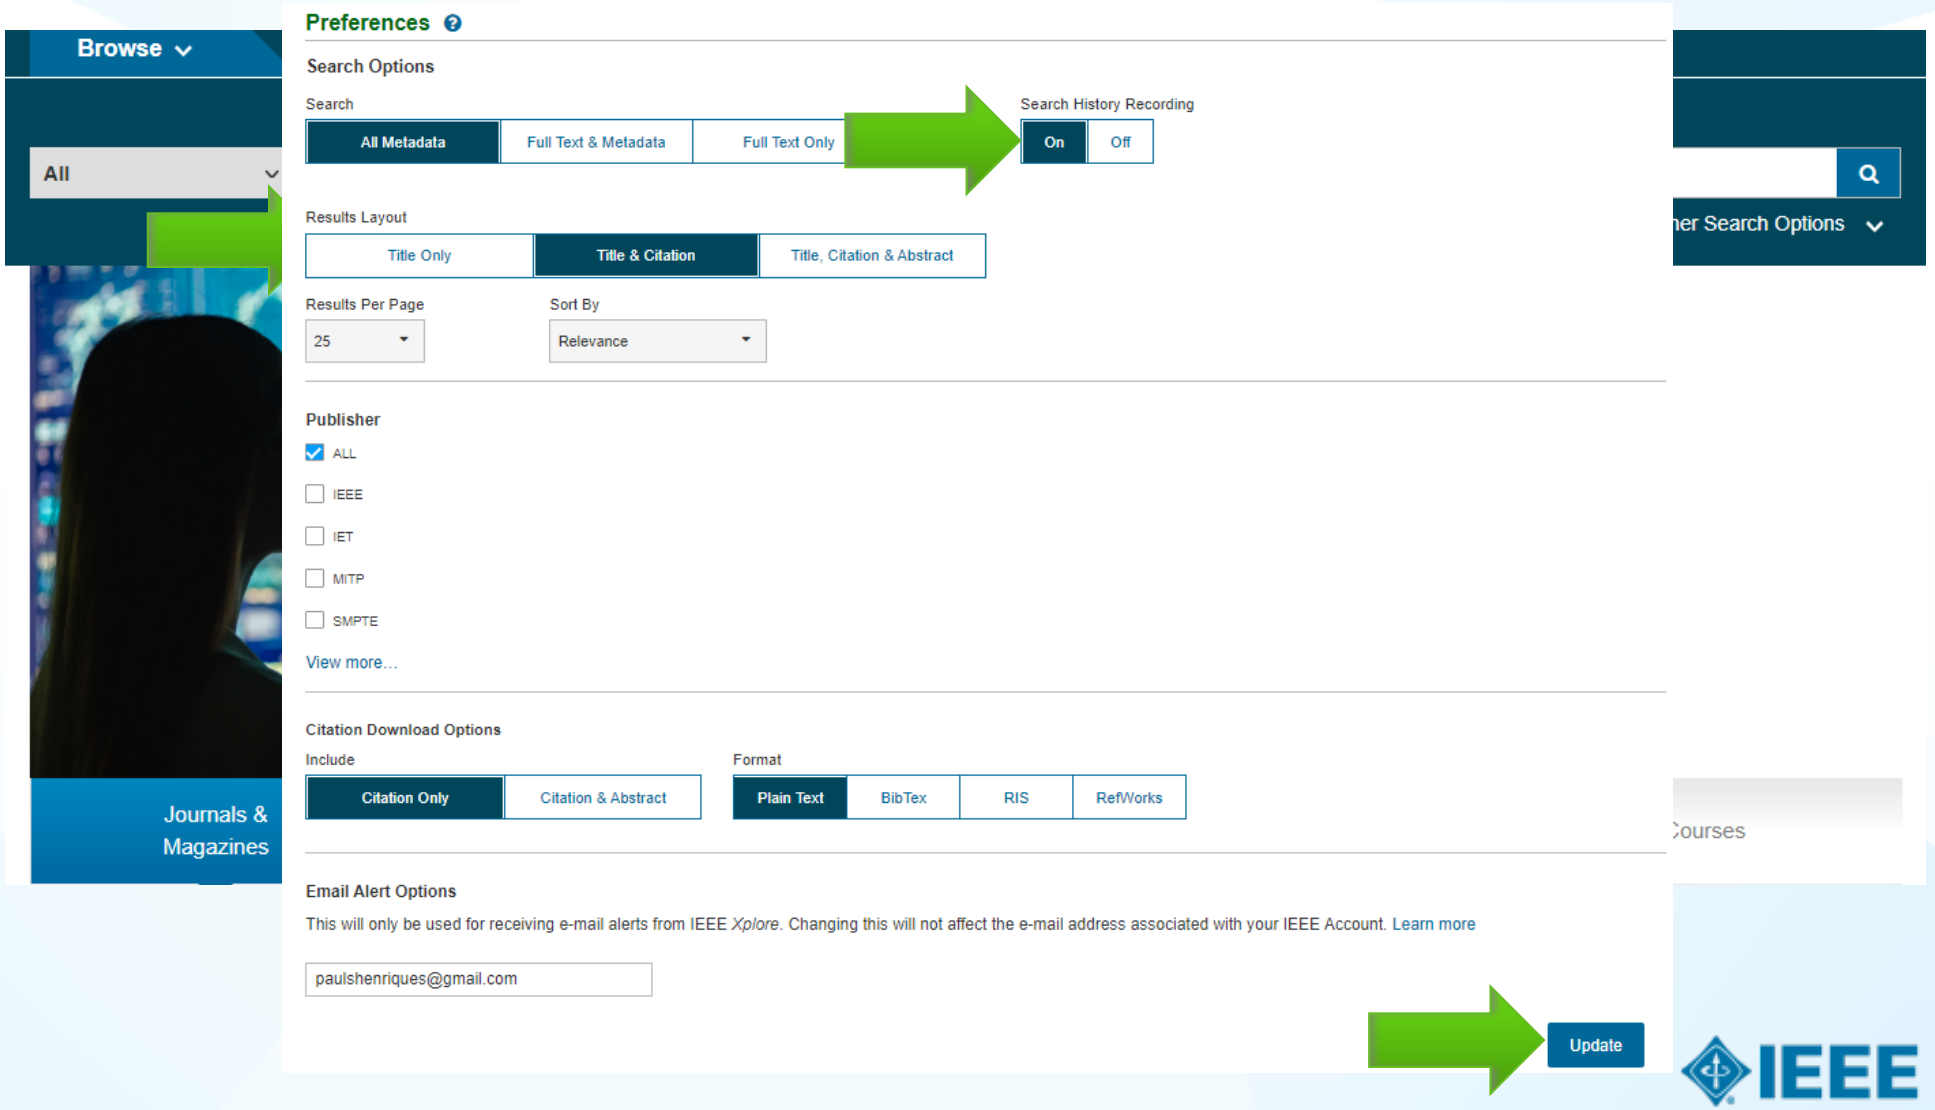

Organize Your Research with a Free IEEE *Xplore* Personal Account

- Take advantage of personalized features, such as search preferences, search history and search alerts
- Select "Create Account" link on the top of any IEEE *Xplore* page
- Fill out your First Name, Last Name, and email address
- Your username is your email address

Set Preferences with a Personal Account

NOTE: Search History defaults to “Off.” Switch to “On” then click “Update” at the bottom of the page.

Personal Account: Features to Save IEEE Content

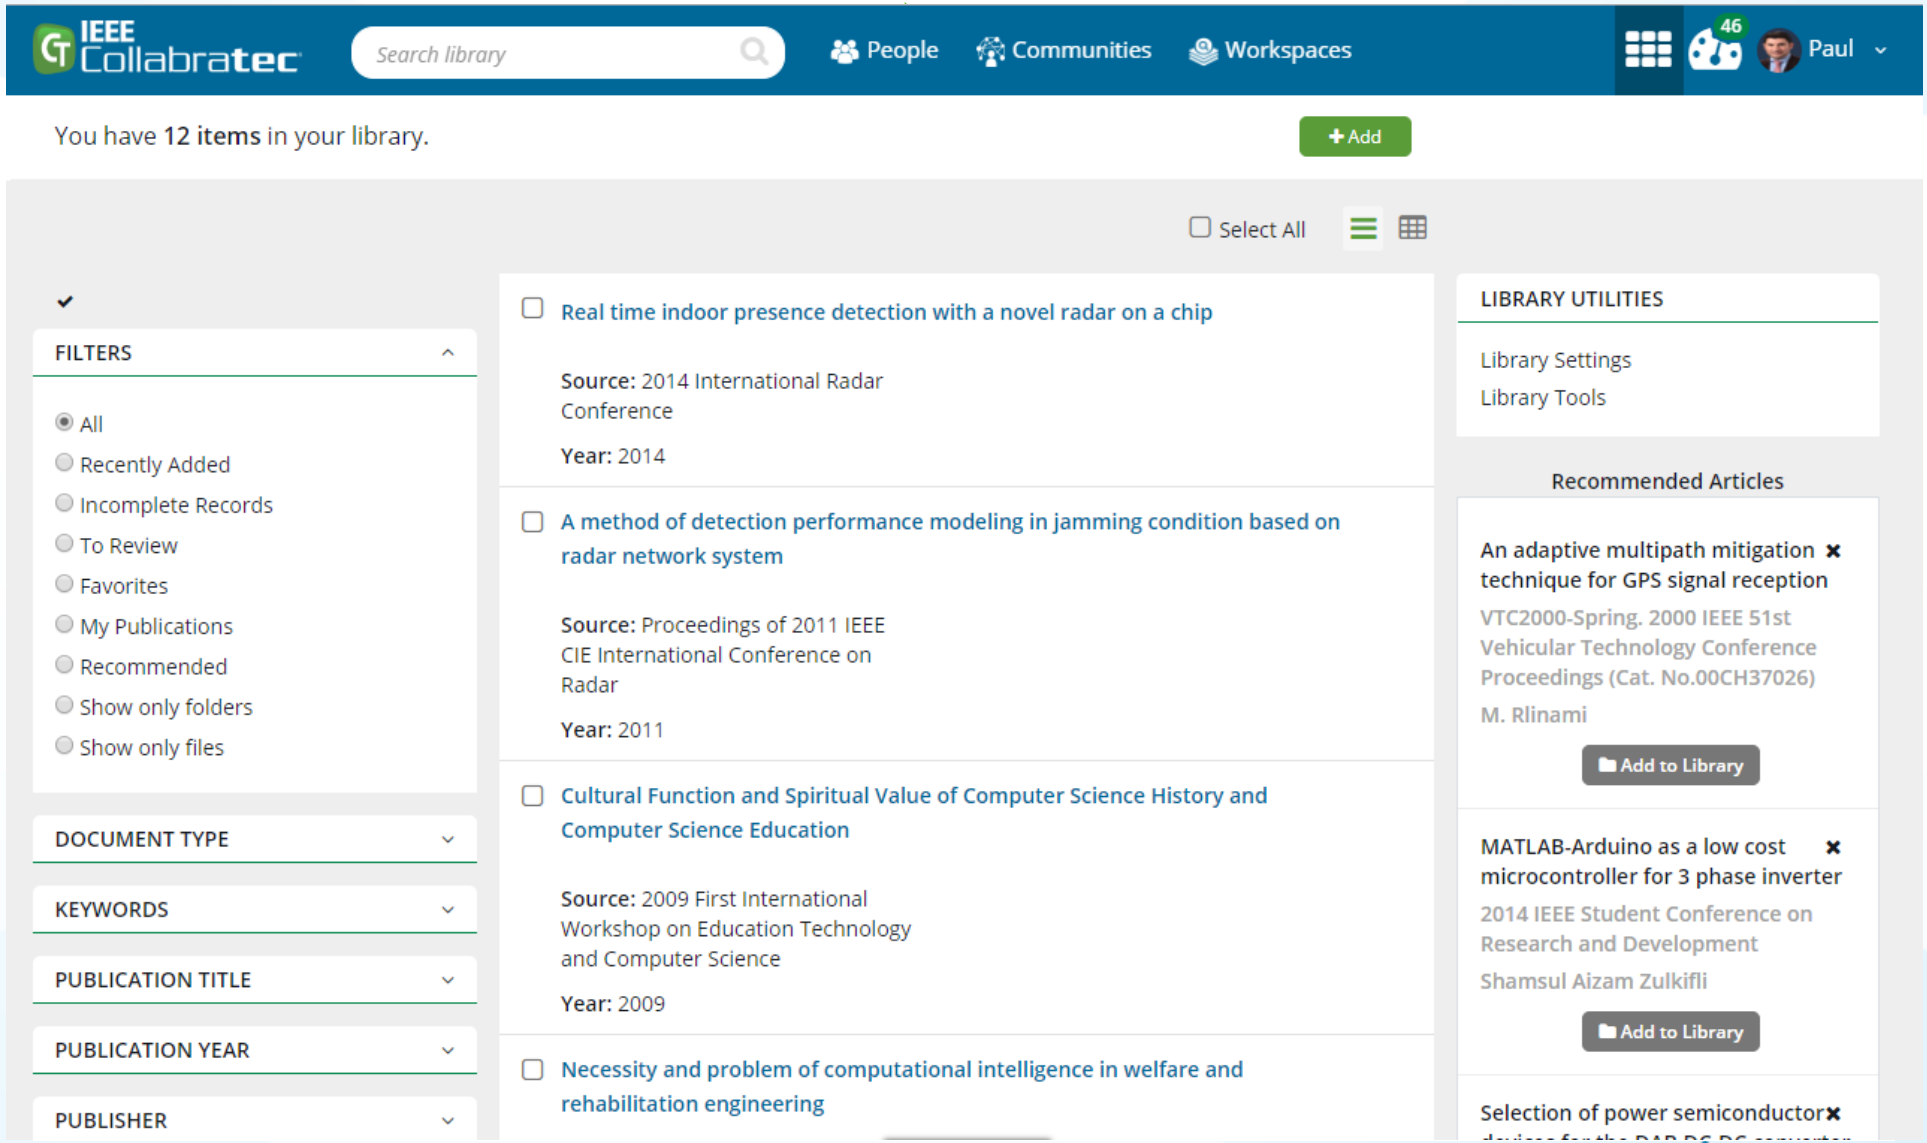

- Download citations & export results (no Personal Account needed)
- Export articles to IEEE Collabratec Personal Library
- Saving a Search Alert: Limit of 15 saved searches, results delivered on Wednesdays
- Set defaults for number of results per page, citation downloads, and sort by
- Content and citation alerts
- Search History: IEEE *Xplore* saves your last 50 searches

IEEE

Appendix

Getting Started With Your Search

	Basic Search	Advanced Search	Command Search
Boolean Operators (AND/OR/NOT)	Yes	Yes (not within single search box)	Yes
Proximity Operators (NEAR/ONEAR)	Yes	No	Yes
Field Searching	Yes	Yes	Yes

	Character	Description
Wildcards	* ?	- Asterisk (*) represents a single character, multiple characters, or no characters - "?" character supported for single Wildcard - Wildcards CAN be used within phrased searches - Wildcards CAN be used with proximity operators NEAR#/ONEAR#
Phrase	" "	- Use quotes (" ") for an exact phrase - Stemmed terms not included in phrased searches

IEEE

Field Searching & Term Limits

- Field Searching groups terms together following a field constraint
- **Example:** “Document Title”:java software program: the terms java, software, and program are matched to the Document Title.
- All terms after a field constraint and up to the next Boolean term (AND/OR/NOT) will be searched against the field specified

- Maximum number of 40 terms can be included in a query
- Field names and operators do not count towards total number of terms
- Limit of 15 maximum terms in a clause (items to the right of a Boolean operator)
- **Example:** The below two searches are the same:

  1) “Document Title”:bitcoin AND “Document Title”:blockchain AND “Document Title”:technology

  2) "Document Title": bitcoin blockchain technology

Wildcards

- Wildcards can be used at the beginning, middle, or end of a word
- Maximum number of wildcards per search: 5
- Minimum number of characters required for wildcard: 3 (exception: Author Facet minimum is 2)
- Supported with Proximity Operators – **EXAMPLE:** compute* NEAR/2 machine
- Supported for full-text searches
- Supported for phrased searching
- “?” for single character wildcard is supported

IEEE
